

# CEG Fact File: Weight Management Enhanced Service, 2021-22

## Outline

The Weight Management Enhanced Service (ES) is managed by NHS England. It runs from 1 July 2021 to 31 March 2022. Practices are asked to refer patients on the Obesity register (patients who were 18 years old or over with a BMI of > 30, or > 27 in Black, Asian and other Minority Ethnic groups, in the last 12 months) to a designated weight management programme. The practice will receive £11.50 for each referral made, up to their allocation.

## Which programmes qualify?

Referrals to any of the following programmes are eligible for payment via the Weight Management Enhanced Service:

- **Digital Weight Management** (Eligibility: Patients with obesity and Hypertension and/or Diabetes)
- **Local authority Tier 2 funded programmes**
- **Diabetes Prevention Programme** (Eligibility: Patients with non-diabetic hyperglycaemia)
- **Tier 3 or 4 services**

## How do I claim?

Practices need to submit monthly manual claims to their commissioners. For each referral you need to have the following code in the patient record:

**Referral to weight management service: 1326201000000101**

## CEG tools and resources

- Our **Lifestyle Intervention template** includes the 'Referral to weight management service' code. You'll find this as a page within the 'LTC CEG' template and many others.
- Our **referral documents** are integrated into both clinical systems. For EMIS sites, the Weight Management code hangs from each document. This will automatically code when a referral is saved in the patient record.
- Use our search '**Weight management - coding correction/addition v1**' to help identify patients that need correct coding.
- Use our search '**Weight Management CQRS Claim v1**' to help you claim for your activity.

You can always contact your local CEG Facilitator for further support.
