I confirm that I have read the Blizard H&S Code of Practice and been instructed on the above. I understand the requirements and limitations. I agree to follow good safe working practices specified under the HSWA Act (1974) and in accordance with QMUL policies. I have been made aware of and provided with a copy of the Code of Practices.							
Date(Inductee)							

QMUL has a legal responsibility to protect you from fire risks and provide a fire safety risk assessment. Therefore we need to know if you need assistance during an emergency. A Personal Emergency Evacuation Plan (PEEP) provides those who cannot exit the building unaided during an emergency with the necessary information to be able to manage their escape. This will also provide your department with the necessary information to ensure that the correct level of assistance is always available.

Do you require a PEEP? Yes/No

Access Confirmed by the Institute Laboratory Management: (Principal or Deputy): C.Cox/ Z.Butt/ N. Kibru
Office Access Confirmed by Centre Manager: N. Kingston / S. Matthew / J. Salhan / S. Skeete / Teresa Parker
Office Only Office and Laboratory

## QUEEN MARY UNIVERSITY OF LONDON - FIRE INDUCTION & FAMILIARISATION FORM

(For All Permanent & Temporary Staff, Postgraduate Research Students and Visiting Workers)

	Note: In addition to staff having office and/or laboratory inductions  Heads of Departments must ensure that all temporary and permanent staff, postgraduate research students and others working for more than 3 days in the department receive local fire safety induction, as set out below. The Head of Department may designate a member(s) of his/her staff such as Departmental Safety Coordinator, Fire Evacuation Marshal etc. to undertake this induction / familiarisation on his/her behalf. This form should be used when carrying out local fire safety induction / familiarisation to record that the necessary information has been provided. This form should be retained by the department (either a hard copy or electronically) so that an accurate record is kept of staff familiarisation arrangements provided by the department and for inspection by the Fire Brigade if required. Please tick the reason for the induction / familiarisation below.						
	□ New Staff Induction □ Periodic refresher training (bi-annually) □ Change of location or building						
L	Increased risk due to changes to work process, equipment or environment etc.						
	Q1. Have you been involved in a Fire Evacuation of your building in the past 12 months - Yes/No?						
	Q2. Are you familiar with your main and alternative escape routes from your place of work – Yes/No						
	SUBJECTS TO BE COVERED:						
	How to raise the fire alarm on discovering a fire and the action to be taken on hearing the fire alarm						
	How to call the Fire Brigade either by dialling Ext: '3333' in the first instance, or (9)999						
	Physical travel of the Fire Escape Route(s) - Must be completed on initial induction or if answer to Q1/Q2 is no						
	From workstation to all floor fire exits (i.e. from work location to the stairs or external exits if on the ground floor)						
	From fire exits on the floor on which the workstation is situated to the relevant external exit doors of the building (from stairs to exit)						
	Physical travel of the route(s) to the location of buildings fire assembly point(s) (if not obvious from final fire exit)						
	The identification of Fire & Smoke Resisting Doors and their importance in preventing the spread of fire and smoke into occupants' escape routes from the building (doors marked as 'Fire Door Keep Shut' / 'Fire Door Keep Locked' must be kept closed at not wedged open under any circumstances. Where doors are marked 'Automatic Fire Door Keep Clear, then the door will release on activation of the fire alarm system & must not be obstructed.						
	DEMONSTRATE THE FOLLOWING IF APPLICABLE:						
	The Emergency Door Release Mechanisms e.g. 'Push Bar to open' Thumb turns, ASSA/Union Dome Covers.						
	<b>Electromagnetic Door Locking Systems</b> (release and emergency Break Glass overrides, operation of the 'green box' overrides system fitted to doors). Note most doors fitted with electromagnetic locks will automatically release on activation of the fire alarm system.						
	IN ADDITION AND WHERE APPROPRIATE:						
	Informing individual members of staff of their 'duty of care' to assist in the evacuation of students, the public and disabled people- (evacuation of occupants from libraries, museums, cluster rooms, lecture theatres and seminar rooms. The non-use of lifts, local refugees and arrangements for assisting those with disabilities including Disabled Evacuation Chairs)						
	An explanation as to Fire Safety Signs and their meaning.						
	For those working in areas where 'Shut Down' procedures apply (laboratories/workshops/ kitchen safety shut down procedures in the event of fire (i.e. power and equipment isolation, gas cylinders isolation or hazardous process shut down etc.)						
	<b>Specific or other Relevant Local Information / Instructions</b> e.g. mandatory online fire safety awareness training at <a href="http://www.hsd.qmul.ac.uk/training/online-learning/">http://www.hsd.qmul.ac.uk/training/online-learning/</a>						
	I have been shown the fire safety induction, relevant for the area for which I am working and I will follow the procedure (as appropriate) as outlined by the person/s providing the induction. I understand I must undertake the mandatory fire safety online course as part of this induction.
