

# Proactive Care Contracts 24-25

CEG Tuesdays, 14 January 2025

**Shazia Shahzad**

Primary Care Facilitator (City & Hackney)

Clinical Effectiveness Group (CEG)

---

# Proactive Care **Home Visiting**

## Two separate contracts:

- Proactive Care **Home Visiting** – for housebound/temporarily housebound patients
- Proactive Care **Practice Based** – for patients able to come in

Queen Mary Whitechapel campus

# Proactive Care **Home Visiting**

## Adding patients to the register:

- Code with: 'Ongoing home visits by GP required'
- Code as: 'Housebound' or 'Temporarily housebound'

## Mid-year update:

- **NEW** Extended target – practices can achieve payment for more patients

## To achieve 90% payment:

- Achieve at least the minimum payable register target
- Achieve an average of 4 visits across the payable register

# Proactive Care **Home Visiting**

## How do patients become 'Payable'?

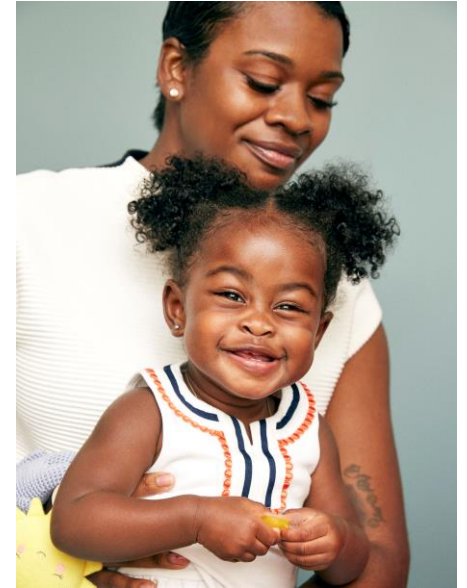

- Has had a minimum of 2 visits in-year
- Care plan review coded on the same day as at least one visit
- Holistic needs assessment to be completed in-year
- **NEW** Rockwood Frailty Scale diagnosis to be coded for patients aged 65+ (ever)

# Proactive Care **Home Visiting**

## 10% of budget allocated to KPIs:

- Had/declined flu-jab (in-year) [85% target]
- Had/declined Pneumococcal jab (in-year) [76% target]
- Medication review (in-year) [95% target]

# Proactive Care **Home Visiting**

## FAQs

- **Which patients contribute to visit average?** All patients with 2+ visits, including left and died, who have also had a care plan review in-year (not necessarily on the same day as a visit)
- **Do I need to keep topping-up my PCHV register if patients move away or pass away?** Not if you have achieved your minimum payable register and KPI activity as activity delivered on patients L/D is counted
- **Does remote activity count?** **No** – not this year (change from 23-24)
- **Can anybody other than a GP deliver this contract?** A pharmacist can undertake a structured medication review if required

# Proactive Care **Home Visiting**

## Common pitfalls:

- Patients not being coded as housebound – activity is not picked up unless this is done
- At least one care plan not being coded on the same day as a visit
- Patients being coded with incorrect proactive care code (proactive care review instead of home visit for chronic condition)
- Not completing the holistic needs assessment
- Rockwood Frailty Scale diagnosis not being coded – score does not count

## [LIVE DEMONSTRATION OF HOW TO USE THE SEARCHES]

Please contact your local facilitator to request a demonstration if required.

# Proactive Care Practice Based

- Practices do not have a *patient* target, they have a *financial budget*
- Patients in Tier 1 paid at £169.17
- Patients in Tier 2 paid at £338.33
- Practices can decide how many patients they want in T1/T2 up to the budget cap

Queen Mary Whitechapel campus

# Proactive Care **Practice Based**

## Adding patients to the register:

- Code with: 'Provision of proactive care'

## To achieve payment:

- Patients must have a minimum of 2 (Tier 1) or 4 (Tier 2) reviews in-year coded as 'Proactive Care Review'
- Care plan to be reviewed at least once on the **same day** as a review
- Holistic needs assessment to be completed in-year
- **NEW** Rockwood Frailty Scale **diagnosis** to be coded for patients aged 65+ (ever)
- Half of the reviews to be delivered by a GP – 1 review (T1) 2 reviews or a home visit (T2)

# Proactive Care **Practice Based**

## FAQs:

- **Will I be penalised if I do not reach my budget cap?** Practices are paid for the activity they deliver
- **Do remote reviews count?** Yes
- **Can other healthcare professionals deliver this activity?** Yes
- **Do home visits count?** Yes, but only if the patient is in tier 2

## [LIVE DEMONSTRATION OF HOW TO USE THE SEARCHES]

Please contact your local facilitator to request a demonstration if required.

Thank you – questions?
