

CEG Fact File

Supplementary Care Home Service – using the dashboard

‘About’ tab

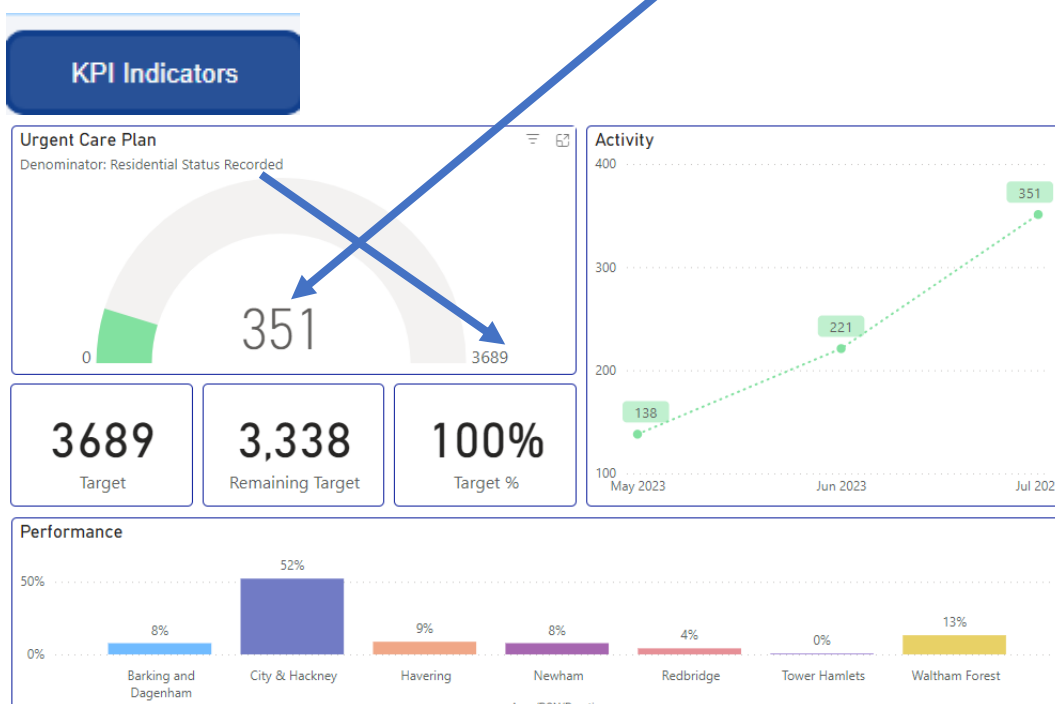

Gives overview information on the reporting criteria to the right of the page.

Inclusion: Residents within CQC registered nursing homes or older adults residential care homes (excluding Mental Health and Learning Disability)	
Source: <ul style="list-style-type: none"> • The data contained within this dashboard is extracted from GP clinical systems only and is based on their registered population. Data must be coded to be extracted. Purpose: <ul style="list-style-type: none"> • This dashboard reports on a number of indicators for the Care Home Supplementary Service. Audience: <ul style="list-style-type: none"> • This dashboard is produced for North East London NHS. For further details, please refer to care home supplementary specification. 	Reporting: This dashboard reports on a number of quality indicators which are part of the Comprehensive Geriatric Assessment (CGA). <ul style="list-style-type: none"> • Maintain a Care Home Register • CGA Target - 100% (unless End of Life Care (EOLC) patient who dies within first week of admission) • Personalised care and support plan (PCSP) - 100% (unless EOLC patient dies within the first week of admission) • Average of 3.5 reviews across all patients in care home per year • Minimum one Structured Medication Review coded target - 100% • Urgent Care Plan created/declined - 100% • Flu vaccination - 75% • Pneumococcal Vaccination - 75% • This dashboard reports on the number of patients who had a multidisciplinary team meeting

‘KPIs’ tab

As an example

- 351 - this figure is showing how many Urgent Care Plan carried out so far
- 3689 – is how many Residential Status Recorded
- 100% - is the required target to meet.

Below are essential requirements for Urgent Care Plan, by choosing each individual section the dashboard will show numbers of how many have been completed.

For example, there are 351 Urgent Care Plans done, but Geriatric Assessment could have a figure of 320, this means some patients did not have a Geriatric Assessment done or the template was not completed correctly.

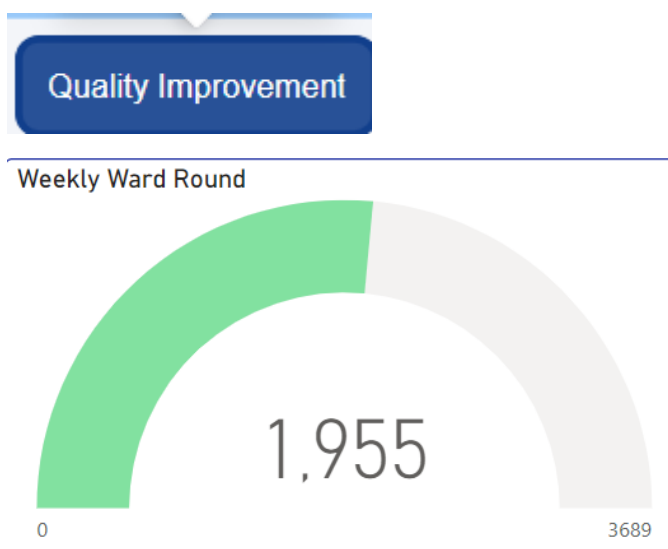

KPI

Urgent Care Plan ^

- Urgent Care Plan
- Personalised Care and Support Plan
- Geriatric Assessment
- Structured Medication Review
- Influenza Vaccination
- Pneumococcal Vaccination (ever)

Quality Improvement

We are reporting on the number of patients who have had a Weekly Ward Round recorded to date.

- Weekly Ward Round
- Mobility Recorded
- Vision Recorded
- Hearing Recorded
- Functional Assessment Recorded
- Personal Care Recorded
- Patient's Condition Recorded
- Pressure Sore/Ulcer Recorded

Weekly Ward Round ^

Parent searches

Geriatric Assessment: Mobility, Vision, Hearing, Functional Assessment, Personal Care, Patients Condition, Pressure Sore/Ulcer.

Residential Status: Weekly Ward Round, Falls, Frailty, Dementia, Depression, Palliative, Vaccination, A&E attendance.

Parent search – Example, number of patients who had a weekly ward round recorded (in this case 1,955) is coming off residential status, so the figure 3689 is residential status recorded

QI

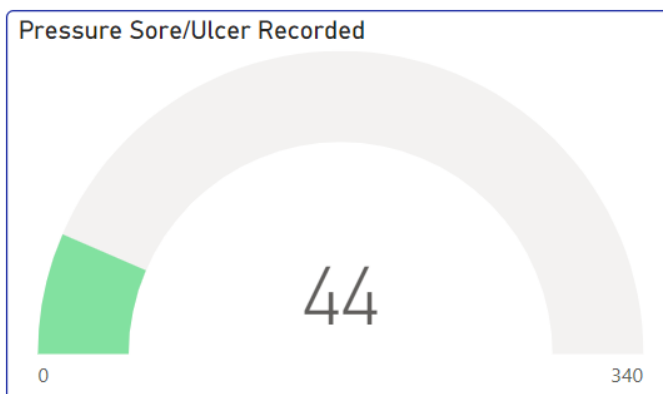

Pressure Sore/Ulcer Recorded

Parent searches

Geriatric Assessment: Mobility, Vision, Hearing, Functional Assessment, Personal Care, Patients Condition, Pressure Sore/Ulcer.

Residential Status: Weekly Ward Round, Falls, Frailty, Dementia, Depression, Palliative, Vaccination, A&E attendance.

Pressure Sore/Ulcer Recorded is coming off Geriatric Assessment, in this example there are 340 patients who have had a Geriatric Assessment recorded and out of those patients, 44 have had Pressure Sore/Ulcer Recorded so far.
