Wed.,	" 3.—	Clinical Lecture. 12.45 p.m. Mr. D'Arcy Power.
Thurs.,	" 4.—	Primary F.R.C.S. Exam. begins.
Fri.,	" 5.—	Clinical Lecture. 12.45 p.m. Dr. Tooth. Dr. Herringham and Mr. Lockwood on duty.

Editorial.

THE new Session at "Bart.'s" begins in a very unobtrusive manner. There is no flourish of trumpets, no pomp and circumstance of an Inaugural Address to mark the commencement of another academic year. We find ourselves once more in the full swing of the Sessional work with nothing except an accession of new students amongst us to remind us that anything important has occurred. We may lose some advertisement by this unostentatious method of getting to work, but we are glad to think that the reputation of our Hospital is such as to need no adventitious puffing by being specially and periodically brought into public prominence.

In keeping with this absence of ceremony, the JOURNAL does not, like some of its contemporaries from other Hospitals, mark the occasion by the issue of any Special Students' Number. The information, that would form the substance of such a number, is so readily accessible to all in the Hospital Calendar, or can be so easily obtained from the Tutors, that we have not thought it worth while to alter the usual character of our columns by its reproduction here. Yet tradition has assigned one duty to the Editor of the JOURNAL, which we have no intention of neglecting,—that of addressing a few words of welcome and advice to the Freshmen, who have just joined us.

The first part of this duty it is an unmixed pleasure to undertake. Some of the new men have but recently come from school. These, in spite of the pessimists who are as busy as ever this year with their complaints of overcrowding, we may still congratulate on their choice of a profession. Many more come to us from the older Universities, where they have already given some years to medical studies. All alike we welcome with equal cordiality to St. Bartholomew's, and congratulate them on their choice of a Medical School. We are convinced that they will never have reason to regret the choice. They will find the name of St. Bartholomew's a real assistance to
