

Programme Specification (UG)

Awarding body / institution:	Queen Mary University of London
Teaching institution:	Queen Mary University of London
Name of final award and programme title:	BSc Environmental Science with Business Management with a Year Abroad
Name of interim award(s):	
Duration of study / period of registration:	3 Years Full time
QMUL programme code / UCAS code(s):	F8NY
QAA Benchmark Group:	Earth Science, Environmental Science and Environmental Studies
FHEQ Level of Award :	Level 6
Programme accredited by:	
Date Programme Specification approved:	
Responsible School / Institute:	School of Geography

Schools / Institutes which will also be involved in teaching part of the programme:

School of Biological & Chemical Sciences

Department of Law

School of Engineering & Materials Science

School of Business & Management

Institution(s) other than QMUL that will provide some teaching for the programme:

N/A

Programme outline

From global challenges such as climate change and the loss of biodiversity to protecting the quality of local waterways we are all affected by environmental issues. The BSc Environmental Science with Business and Management with Year Abroad provides core training in physical and biological sciences, and will enable you to understand these complex problems and train you to protect and manage the environment. It also enables training in business and management skills equipping its students with the opportunity to pursue environmental careers in a commercial setting.

This is a multi-disciplinary, flexible degree programme, reflecting the complexity of relationships within the natural

Programme Title: BSc Environmental Science with Business Management with a Year Abroad

environment and human interactions with it. You will be taught by staff from the School of Geography, as well as the Schools of Biological and Chemical Sciences and Business and Management (with further options to take modules in other Schools). There will also be the opportunity to interact with industry and environmental practitioners. The programme provides core training in environmental science research skills and techniques. You will benefit from significant recent investment in laboratory facilities and field equipment.

Aims of the programme

As a leading centre of business, environmental and ecological research, the Schools of Geography, Biological and Chemical Sciences and Business and Management's shared mission is to teach their students to the very highest academic standards, drawing in creative and innovative ways on their research.

We aim to:

- share our enthusiasm for geographical learning and scholarship with our students;
- introduce our students to a range of geographical and environmental knowledge and understanding shaped by staff research interests and by appropriate external frameworks such as the geography and environmental science benchmarking documents;
- enable students to specialise within particular fields (defined largely by staff research interests) of geography and environmental science;
- develop intellectual, discipline-specific and key skills as indicated, for example, in the benchmark statements for both geography and environmental science;
- encourage self-reflective awareness of the acquisition of these skills;
- foster critical thinking skills about the world and a continuing sense of enquiry;
- facilitate a range of personal attributes relevant to further achievement in the world beyond undergraduate and postgraduate education.

Our BSc Environmental Science with Business Management with Year Abroad degree programme provides students with the knowledge required to understand and manage the biological and physical processes that shape the environment around us and, in particular, to develop understanding of aquatic environments, utilising interdisciplinary expertise within the School of Geography the School of Biological and Chemical Sciences, and the School of Business and Management. The programme also aims to develop and understanding of the spatial and temporal scales over which these processes operate while examining the complexity of relationships within the natural environment and human interaction with it. Students will also develop the intellectual and practical skills, including field and laboratory training, necessary to collect, analyses, interpret and understand a range of environmental data. The programme also develops key skills and attributes for further study and employment where environmental knowledge and skills will be applied. The study of accounting, marketing, strategy and management techniques will provide critical insights into key aspects of the theory and practice of business and management which might be applied in environmental situations.

What will you be expected to achieve?

Teaching and learning in the programme are closely informed by the active research of staff particularly in relation to the Earth Surface Science research theme in the School of Geography. Some modules are taught by members of staff who specialise in aquatic ecology and organismal biology in the School of Biological and Chemical Sciences. Similarly, the expertise, consultancy experience and research interests of staff in Business and Management inform the teaching and learning on that part of the programme.

The programme provides opportunities for students to achieve and demonstrate the learning outcomes listed in the following sections. These use the Benchmark Statement in Earth Science, Environmental Science and Environmental Studies as a framework interpreted in ways which reflect the distinctive nature of our research and teaching in geography and the other participating Schools. It is expected that the inclusion of a year spent studying abroad at another institution will broaden students' horizons and provide opportunities to develop and expand their capabilities as well as gain new perspectives. Spending a year studying abroad fulfils the requirements of the QMUL Model for that developmental year.

QMUL Model

The QMUL Model is an innovative teaching and learning initiative that will broaden opportunities for Queen Mary undergraduates within and beyond higher education, supporting them to plan and manage their ongoing professional development. The Model is firmly grounded in the core QMUL values of respect for, and engagement with, the local area and communities, with a distinctive focus on enabling students to make a positive societal impact through leadership in their chosen field. The Model is organised around the key themes of:

- networking
- multi- and inter-disciplinarity
- international perspectives
- enterprising perspectives.

Students are required to study QMUL Model modules to the value of at least 10 credits at each year of undergraduate study. Model modules may be 5, 10 or 15 credits. Model modules are indicated within this programme specification.

In your first year of study, the Model module will be core or compulsory and will be situated within your home School or Institute. In subsequent years, students will be strongly encouraged to study at least one Model module beyond their home discipline(s), which could, for example, be in another School / Institute or area of QMUL or undertaken as a module outside of QMUL.

If Model module information is not provided on this programme specification for all subsequent years of study, this will be identified as your studies continue.

Where a Model module elective can be selected from an approved group of Model modules, no guarantee can be provided that your first choice of Model module will be available.

Academic Content:	
A1	The need for a multi-disciplinary and an interdisciplinary approach in advancing knowledge and understanding of earth systems drawing from both the natural and social sciences
A2	Processes which shape the natural world at different spatial and temporal scales and influences on and by human activities
A3	Issues concerning the availability and sustainability of resources
A4	The operation of physical systems – their complexity and interrelationship
A5	Human systems and their interaction with global systems
A6	The role of institutions, organisations and other stakeholders in managing and regulating the human impact on the environment
A7	The significance of spatial and temporal scale
A8	The role and significance of change as central process in the physical world

Programme Title: BSc Environmental Science with Business Management with a Year Abroad

A 9	The diverse forms of representations of the physical world
A 10	The main methodological strategies used in the acquisition, interpretation and analysis of environmental information with a critical understanding of appropriate contexts for their uses
A 11	The contribution of environmental science to the debate on environmental issues and how knowledge of these forms the basis for an informed concern about the earth and its people
A 12	modern business issues and theories and management techniques
A 13	the connections between the environment and modern business and management forms

Disciplinary Skills - able to:	
B 1	Planning, designing and executing a piece of rigorous research or enquiry, including the production of a piece of original research
B 2	Describing and commenting upon particular aspects of current geographical and environmental research
B 3	Undertaking effective field work (with due regard to safety and risk assessment)
B 4	Working safely in a scientific laboratory, with awareness of standard procedures
B 5	Preparing effective maps and diagrams using appropriate technologies
B 6	Employing a variety of technical and laboratory-based methods for the collection and analysis of spatial and environmental information
B 7	Combining and interpreting different types of geographical evidence

Attributes:	
C 1	Engage critically with knowledge (acquire and apply knowledge in a rigorous way; connect information and ideas within their field of study; use writing for learning and reflection; adapt their understanding to new and unfamiliar settings)
C 2	Have a global perspective (engage with the professional world)
C 3	Learn continuously in a changing world (acquire new learning in a range of ways, both individually and collaboratively; use quantitative data confidently and competently)
C 4	Rounded Intellectual Development (good judgement; curiosity and openness to change; initiative and resilience in meeting challenges; respect for the opinions of others and a readiness to act inclusively; the ability to reflect upon and assess their own progress; transferable key skills to help them with their career goals and their continuing education)
C 5	Clarity of Communication (develop effective spoken and written English; explain and argue clearly and concisely; apply different forms of communication in various social, professional and cultural settings; use communication technologies competently)
C 6	Research Capacity (grasp the principles and practices of their field of study; produce analyses which are grounded in evidence; apply their analytical skills to investigate unfamiliar problems; work individually and in collaboration with others; develop a strong sense of intellectual integrity; acquire substantial bodies of new knowledge)

C 7	Information Expertise (identify information needs appropriate to different situations; use technologies to access and interpret information effectively; critically evaluate the reliability of different sources of information; use information for evidence-based decision-making and creative thinking)
-----	---

QMUL Model Learning Outcomes - Level 4:	
D 1	(Networking) Identify and discuss their own career aspirations or relevant skills and knowledge and how they i
D 2	(Networking) Identify and discuss what their own role in their programme and/or subject discipline might mea
D 3	(Multi/Inter-Disciplinarity) Identify and demonstrate the perspectives or problem solving techniques of differe
D 4	(Multi/Inter-Disciplinarity) Demonstrate connections between different theoretical perspectives within your di
D 5	(International Perspectives) Discuss socio-cultural values and practices with others
D 6	(International Perspectives) Consider the role of their discipline in diverse cultural and global contexts

QMUL Model Learning Outcomes - Level 5:	
E 1	(Multi/Inter-Disciplinarity) Demonstrate how discipline specific problem solving techniques or approaches may be gel
E 2	(Multi/Inter-Disciplinarity) Evaluate perspectives from different disciplines
E 3	(International Perspectives) Reflect on socio-cultural values and skills within diverse cultural and global contexts
E 4	(International Perspectives) Analyse the impact of diverse cultural and global contexts upon aspects of their discipline
E 5	(Networking) Evaluate and demonstrate their own attitudes, values and skills in the workplace and/or in the wider wo
E 6	(Networking) Evaluate and demonstrate evidence of their skills to support networking and how these have influenced

QMUL Model Learning Outcomes - Level 6:	
F 1	(Networking) Apply a critically reflective approach to how they have developed their subject, work-based and
F 2	(Networking) Apply a critically analytical approach to how they can help to shape and influence their future ca
F 3	(Multi-/inter-disciplinarity) Apply a critically analytical approach to an appropriate range of multi-disciplinary
F 4	(Multi-/inter-disciplinarity) Model a holistic approach to knowledge which draws on a range of appropriate dis
F 5	(International perspectives) Apply subject, work-based and general life skills in multi-cultural and global envir

F 6	(International perspectives) Demonstrate evidence of a personal ethic which is informed by a critical awareness
F 7	(Enterprising perspectives) Justify approaches they have taken when participating in module based enterprise
F 8	(Enterprising perspectives) Critically evaluate how they have enhanced their knowledge, understanding and s

QMUL Model Learning Outcomes - Level 7:

G 1	
-----	--

How will you learn?

The programme will be taught in accordance with the School of Geography's Teaching and Learning Strategy. The School of Geography is committed to developing, maintaining and supporting excellence in teaching and learning, to innovation in teaching practice, and to fostering independent learning and critical thinking in our students, whilst providing appropriate levels of support to students in their learning.

The delivery of teaching will take a number of forms:

- lectures
- small group tutorials
- seminars
- workshops
- computing practical classes
- guest speakers
- individual supervision of projects, dissertations and internships
- fieldwork
- laboratory work
- independent study resources

Learning will be supported by:

- coherently designed and effectively delivered modules
- detailed module handbooks, providing learning outcomes and guided reading for each module
- the provision of key materials in libraries or through electronic resources
- individual feedback on written work
- appropriate assessment exercises within each module
- provision of supporting materials (e.g. Powerpoint slides, recorded lectures, handouts, reading lists) via QMplus (QM's dedicated and interactive on-line learning environment)
- encouraging active participation by students in small group discussions
- research methods training
- guided independent study resources

How will you be assessed?

Assessment is varied and will take a number of forms within the programme. The nature of the assessment is closely connected to the desired learning outcomes and the mode of teaching within each module. Forms of assessment include:

- seen and unseen examinations

- coursework essays
- research projects and dissertations
- project synopses
- student presentations and role play exercises
- oral projects and presentations
- literature reviews
- fieldwork and laboratory reports

How is the programme structured?

Please specify the full time and part time programme diets (if applicable). Please also outline the QMUL Model arrangements for each year of study. The description should be sufficiently detailed to fully define the structure of the diet.

The programme is structured around a set of compulsory modules and a range of optional modules, as identified in the list below.

Students take modules up to the value of 120 credits in each of their 4 Developmental Years. Students in Developmental Year 1 are required to take level 4 modules. Students in Developmental Year 2 select level 5 modules. Students in Developmental Year 3 will select level 5 modules equating to 120 credits from their overseas institution. Students in Developmental Year 4 will normally select level 6 modules, but are permitted to take some level 5 modules up to the value of 30 credits. Further information on College rules governing progression and award of degrees can be found at www.arcs.qmul.ac.uk

During Developmental Year 1, students take 105 credits of compulsory modules and 15 credits of optional modules. The compulsory modules are designed to provide a firm grounding in environmental issues, environment and ecology and in appropriate research methodologies, approaches to environmental study and fieldwork and generic skills training.

During Developmental Year 2, students take 90 credits of compulsory and 30 credits of optional modules. The compulsory modules are designed to provide students with a more advanced understanding of the material cycles that are fundamental to the functioning of the earth system. They also offer an introduction to research strategies and project design (including research proposal writing) as well as experience in core field and laboratory techniques, in preparation for independent research undertaken at Level 6. Compulsory Business and Management modules cover marketing and financial accounting. The optional modules provide students with the potential to extend their knowledge of biological ecosystems and of environmental, physical and human aspects of geographical research by drawing upon existing modules offered in the School of Geography and the School of Biological and Chemical Sciences. Students must achieve an overall average of 60% or higher during their first two years of study in order to progress to the Study Abroad year. If they fail to do so, they will be transferred onto the three-year version of the programme.

In Developmental Year 3, students will choose Year Abroad modules equating to 120 credits from their overseas institution in dialogue with their academic advisor, to best suit their degree and ensure they maximize their academic trajectory. They will study the majority of modules in their core subject, developing their skills while witnessing how the discipline is taught in another context, but they may take modules outside their discipline, expanding their horizons and providing for future development. Students must pass the assessments set by the partner institution in order to progress to year 4 of the programme. If they fail to do so, they will be transferred onto the three-year version of the programme.

During Developmental Year 4, students take 60 credits of compulsory modules and 60 credits of optional modules. One compulsory module is the Project in Environmental Science which is based on undertaking original research. This module is seen as the culmination of students' training in research design, methods, analysis and presentation and demonstrates their ability to deploy accurately techniques of analysis and enquiry. Students must also take modules dealing with business strategy and human resource management. The remaining 75 credits are selected from a range of specialist 15 or 30 credit modules, which reflect the distinctive research expertise of Geography and Biological and Chemical Science staff teaching on the programme and may include opportunities to undertake overseas fieldwork.

Note that not all of the elective modules listed in the following table will be offered every year. Some level 5 and level 6 modules can only be taken if certain pre-requisite level 4 or level 5 modules have already been completed; these requirements are detailed in handbooks and module descriptions on-line.

Programme Title: BSc Environmental Science with Business Management with a Year Abroad

At Level 5 - Students can take one only of any of these three modules - GEG5231 (Fragile Environments) or BIO294 (Ecological Interactions II), or GEG5141 (New York: Nature and the City)

***At Level 6 - Students can take EITHER/OR but not both - BIO391(Tropical Ecology and Conservation) , BIO397 (Species: Dinosaurs to DNA)**

Academic Year of Study FT - Year 1

What are the entry requirements?

The School considers each candidate individually. Entry requirements are as follows:

A-levels

Tariff/Grades requirement: A range of offers is ABB-BBB with a typical offer of ABB for 2018 entry. One science A-level at grade B is required for F850 BSc Environmental Science with Business Management. Excluded subjects: General Studies.

Vocational or applied A-levels

The following Applied A-levels and Double Awards only are acceptable: Art and Design; Business; Information and Communication Technology; Leisure and Recreation; Media; Performing Arts; Science; Travel and Tourism.

English Language:

IELTS 6.5 (Writing 6.0), equivalent qualifications are acceptable.

BTECs:

BTEC Extended Diploma: Typical offer DDM

BTEC Diploma and A Level combination: Typical offer DD plus B at A Level

International Baccalaureate

Acceptability: Acceptable on its own and combined with other qualifications. Subjects and grades required: 30-32 points overall with 6,5,5 - 5,5,5 in Higher Level subjects to include a science subject. Typical offer IB 32 with 6, 5, 5 in Higher Level subjects to include science.

How will the quality of the programme be managed and enhanced?

The School of Geography operates a Teaching and Learning Committee which advises the Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee's work through the reporting of minutes from the Staff-Student Liaison Committee and via the consideration of module evaluations and student surveys.

Like all schools/institutes at Queen Mary, the School of Geography operates an Annual Programme Review (APR) of its taught

undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery. Students' views are considered in this process through analysis of the NSS and module evaluations and through the comments of Staff-Student Liaison Committee.

How do we listen to and act on your feedback?

The Staff-Student Liaison Committee provides a formal means of communication and discussion between the School of Geography and its students. The committee consists of student representatives from each year group together with appropriate representation from staff within the School. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year.

All modules provide end-of-module evaluation questionnaires to be completed by students, the results of which are considered annually by module convenors and teaching teams and may lead to modifications of module content and/or delivery in future years.

What academic support is available?

The Schools of Geography and Biological and Chemical Sciences are welcoming and friendly and all academic and professional support staff play a role in ensuring that students are supported through their studies.

Programme Induction is provided for all incoming students during Welcome Week. This is used as an opportunity to acquaint new students with the format of the programme and expectations of them. Students also receive a library induction. All students meet with a designated Personal Tutor during this week to talk about module selection and how to manage the registration process. Students with special educational needs have the opportunity to talk to their adviser about how the College can best support them, and to agree with the students how to communicate those needs to appropriate members of staff. In week 1 of the first year we also run a week of intensive fieldwork and other activities called 'Investigating London'. This provides an opportunity for extended induction and for staff and students to get to know one another.

All first year students are allocated a Teaching Associate Tutor with whom they will meet for an hour weekly or fortnightly during Semesters A and B and an Advisor with whom they will meet at appropriate intervals. Second year students will meet with their personal tutors (also their Advisors) on a fortnightly basis. The Study Abroad Director will advise and liaise with students prior to going abroad to ensure that their chosen modules satisfy requirements. During the time abroad, the Director will ensure that students are checked on monthly, and will be available to via email to discuss any academic concerns. In the final year, Personal Tutors/Advisors also act as students' Independent Geographical Study supervisors and regular one-to-one meetings take place. All staff have weekly office hours when they are available to see students on a one-to-one basis.

Programme Leaders in Geography are responsible for overseeing the delivery of undergraduate programmes, including monitoring attendance and engagement, and can be consulted about problems and academic issues. The Senior Tutor has overall responsibility for matters concerning student support and welfare within the School of Geography and can be consulted in relation to more serious issues and problems. Finally, the School of Geography participates in Queen Mary's PASS scheme -- a peer-mentoring system where new students can seek advice and support for students at later stages in their degree programme.

Programme-specific rules and facts

N/A

Specific support for disabled students

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:

- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students' Allowance (DSA)
- Arranging DSA assessments of need
- Special arrangements in examinations
- Accessing loaned equipment (e.g. digital recorders)
- Specialist one-to-one study skills tuition
- Ensuring access to course materials in alternative formats (e.g. Braille)
- Providing educational support workers (e.g. note-takers, readers, library assistants)
- Access to specialist mentoring support for students with mental health issues and Autistic Spectrum Disorders.

Links with employers, placement opportunities and transferable skills

We would expect a successful graduate from the BSc Environmental Science with Business Management with Year Abroad programme to have:

- good knowledge and understanding of key the processes that shape the social and economic world and the physical environment
- the ability to employ a variety of social survey and interpretative methods for the collection, analysis and understanding of information from the human world
- the ability to employ a variety of technical methods for the collection and analysis of spatial and environmental information
- good written and verbal communication skills
- good numeracy and analytical skills
- confidence in using Information Technology
- competence in information handling and retrieval
- good interpersonal working skills
- the ability to work autonomously, showing initiative and demonstrating self-awareness and self-management
- flexibility, adaptability and creativity

Throughout their period of study, students are encouraged to reflect upon the acquisition of skills and their future employability. Tutorials in all three years deal with issues such as CV planning, skills development and applying for internships and graduate positions. Working with Queen Mary's Careers Service, the School also hosts employability forums (or similar) with recent graduates who offer insights and advice and encourage students to apply for internships and other activities that provide relevant work experience. Some modules include visiting speakers from industry and/or visits to commercial companies and environmental research organisations.

Graduates from the BSc Environmental Science with Business Management with Year Abroad programme may go on to a wide range of careers including: conservation and environmental analysis, quantity surveying; business and finance; marketing and promotion; human resources; media and communication; planning and regeneration; housing and welfare; community development; teaching and lecturing; research. The degree provides a strong platform for further study at masters level and beyond, especially in physical geography and environmental sciences.

Programme Specification Approval

Person completing Programme Specification:

Emma Shapcott
