Programme Outline

Studying modern languages is about more than vocabulary, grammar and pronunciation: you will also immerse yourself in culture, spend time working or studying abroad and learn to understand the subtleties of communication.

Combining a language with business and management broadens your scope, giving you a greater range of skills to draw on in your future career. The business modules focus on organisations and their operations, and span both public and private sectors. In your language studies you follow core modules designed to help you develop your linguistic skills, and also live for a year in a country where your chosen language is spoken. This can be spent either studying or taking up a work placement.

Aims of the Programme

1. To provide a coherent, innovative and intellectually challenging programme which promotes the study of French language, linguistics, literature and culture to a broad constituency of well-qualified students.
2. To impart a high level of linguistic knowledge and skills, both productive and receptive, in the French language, fostering an understanding of the language itself as a rewarding object of study, from the perspectives of linguistics and philology.
3. To give students access to a range of material in the foreign language that is worthy of study either as a product of the culture

concerned or in a broader cultural and intellectual perspective, or both. This material can be found in different media (written and visual, such as cinema) and different genres (fiction, theatre, poetry, philosophy and so forth). These aims intertwine, since the broader and deeper the student's knowledge of and skills in the language, the broader and deeper the understanding of the material they can achieve.

4. To encourage engagement with a wide variety of critical and theoretical modes of inquiry, enabling students to develop advanced skills of literary and cultural analysis, with attention to genre, period, form and style.

5. The subsidiary business modules focus on organisations and their operations, and span both public and private spheres. The academic content is designed to provide the conceptual and analytical framework that is basic to understanding business activities. Great emphasis is placed on students reading and thinking for themselves, which requires a high degree of self-motivation and discipline.

6. To enable students to develop independent critical thinking and judgment and to undertake independent research tasks.

7. To develop a range of skills necessary to the effective communication of ideas and arguments.

8. To develop a range of subject-specific and transferable skills appropriate to a wide range of subsequent careers; in particular, to develop graduates' capacity for further learning; to prepare them for further study or research; to equip them to meet international, national, regional or local needs.

How Do We Listen and Act on Your Feedback?

The Staff-Student Liaison Committee provides a formal means of communication and discussion between schools/institutes and its students. The committee consists of student representatives from each year in the school/institute together with appropriate representation from staff within the school/institute. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year.

Each school/institute operates a Learning and Teaching Committee, or equivalent, which advises the School/Institute Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee's work in a number of ways, such as through student membership, or consideration of student surveys.

All schools/institutes operate an Annual Programme Review of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery; the main document of reference for this process is the Taught Programmes Action Plan (TPAP) which is the summary of the school/institute's work throughout the year to monitor academic standards and to improve the student experience. Students' views are considered in this process through analysis of the NSS and module evaluations.

Academic Support

All students beginning study on the programme participate in a series of Welcome Week activities, which involve introductions to the programme and specific inductions in the use of the online learning environment. These events also include opportunities for social interaction, and scheduled small group and individual meetings with personal advisers.

Programme Title: BA French with Business Management

Each student's academic progress and personal welfare is monitored by an adviser, the designated members of staff with whom students can raise issues and problems, and from whom they can seek advice and guidance.

All teaching staff hold regular office hours in which students are actively encouraged to discuss their work and their progress.

There is a dedicated Student Experience Manager in the School of Languages, Linguistics and Film, who works with academic staff to assist students in need of support.

Where appropriate, students will be advised to make use of relevant professional service departments in the College, including Disability and Dyslexia, Welfare, and Counselling.

The School of Languages, Linguistics and Film recognises how closely writing is linked to thinking; and how important writing skills are both in the academic and professional worlds, and collaborates with the College's Thinking Writing team which supports students in the development of their writing skills. The College also offers a range of services to support you in your learning and help you develop academically and professionally. These include: Academic Study Workshops, Academic English and Study Skills Support and One-to-One Tutorials working with you on your written assignments.

In addition to your excellent communication skills (written and spoken) you have the cultural flexibility that comes from having lived, and perhaps worked, abroad. Your training in the analysis and interpretation of material as well as in report-writing, group-working and presentation skills is highly valued by future employers. As well as careers linked directly to the subject, such as teaching, translation or interpreting, our graduates are attracted to sectors as diverse as banking, multinational corporations, marketing, PR, sales, management consultancies, the diplomatic service, publishing, the media, law, computing, library management. Each year some of our students go on to study at postgraduate level.
