

Programme Title: BSc Biochemistry, with extramural year variants

Programme Specification (UG)

Awarding body / institution:	Queen Mary University of London
Teaching institution:	Queen Mary University of London
Name of final award and programme title:	BSc (Hons) Biochemistry, BSc (Hons) Biochemistry with year in industry/ research, BSc (Hons) Biochemistry with year abroad.
Name of interim award(s):	
Duration of study / period of registration:	3 year (4 years with an extramural year)
QMUL programme code / UCAS code(s):	C700, 3W45, C70Y
QAA Benchmark Group:	
FHEQ Level of Award :	Level 6
Programme accredited by:	
Date Programme Specification approved:	
Responsible School / Institute:	School of Biological & Behavioural Sciences

Schools / Institutes which will also be involved in teaching part of the programme:

Barts and The London School of Medicine and Dentistry

School of Physical and Chemical Sciences

Collaborative institution(s) / organisation(s) involved in delivering the programme:

Programme outline

This programme aims to provide a comprehensive training in the field of biochemistry, with an introduction to key principles of protein structure and function, the chemical sciences, cell biology, genetics and microbiology. The emphasis is given to molecular concepts of complex biological systems. The degree is particularly suitable for those seeking to pursue a career as a professional scientist in this important field.

Aims of the programme

This degree integrates biology and chemistry, providing a molecular-level description of the living world. The application of

Programme Title: BSc Biochemistry, with extramural year variants

molecular concepts to complex biological systems is at the cutting edge of science in the twenty-first century. Students following this programme receive instruction in key biochemical concepts, the chemistry underpinning these concepts and the applications of biochemistry in biotechnology and the treatment of disease. The programme also provides instruction in related subjects such as molecular biology, physiology and cell biology.

Furthermore to:

- Provide a rational, flexibly structured and coherent programme of study which is relevant to the needs of employers, facilitate the professional development of the student and lay the foundations for a successful career to the benefit of the economy and society;
- provide a sound knowledge base in the fields studied and develop key transferable skills in the areas of communication, numeracy, information technology, working with others, problem solving, time and task management;
- foster the development of an enquiring, open-minded and creative attitude, tempered with scientific discipline and social awareness, which encourages lifelong learning.

What will you be expected to achieve?

You will be expected to achieve the following learning outcomes:

These are outlined below under this broad headings of Academic content, Skills and Attributes

Please note that the following information is only applicable to students who commenced their Level 4 studies in 2017/18, or 2018/19

In each year of undergraduate study, students are required to study modules to the value of at least 10 credits, which align to one or more of the following themes:

- networking
- multi- and inter-disciplinarity
- international perspectives
- enterprising perspectives.

These modules will be identified through the Module Directory, and / or by your School or Institute as your studies progress.

Academic Content:

A1	Essential facts, fundamental concepts, principles and theories fundamental to biochemistry.
A2	Facts, concepts, principles and theories across a range of topics in chemistry; including biological and organic chemistry.

Programme Title: BSc Biochemistry, with extramural year variants

A3	Facts, concepts, principles and theories across a wide range of topics in biology; including molecular biology, cell biology and genetics.
A4	Emphasis on structure and function of proteins, in particular membrane proteins and enzymes
A5	Emphasis on modern biochemical techniques including a range of spectroscopies and X-ray crystallography.
A6	Aspects of molecular medicine and disease processes at the molecular level.

Disciplinary Skills - able to:	
B1	Reason critically.
B2	Integrate theory and practice.
B3	Identify and formulate problems.
B4	Apply biochemical knowledge and problem solving skills in a wide range of theoretical and practical situations.
B5	Analyse and evaluate/interpret the results of controlled experiments.
B6	Devise strategies for the retrieval and selection of relevant information from a wide range of sources.

Attributes:	
C1	Communicate effectively by written and/or verbal means.
C2	Manage time, prioritise workloads and work to deadlines.
C3	Undertake independent learning.
C4	Work independently.
C5	Participate constructively as a member of a group/team.
C6	Assess the relevance, importance and reliability of the ideas of others.
C7	Appreciate and discuss the role and impact of science in society.
C8	Use IT/computer based technology to locate information, to analyse, manipulate and present data

How will you learn?

Acquisition of knowledge is achieved mainly through lectures and directed independent learning. Understanding is reinforced through a combination of tutorial workshops, problem classes and laboratory classes (depending upon the module concerned), including regular feedback on submitted work. Additional learning support is provided through Queen Mary's online learning environment and the facilities of the QMUL Student PC Service.

How will you be assessed?

Practical skills and report-writing skills are assessed through written laboratory reports, which include attention to quantitative accuracy. Other skills are assessed through a combination of coursework and formal written examination.

How is the programme structured?

Please specify the structure of the programme diets for all variants of the programme (e.g. full-time, part-time - if applicable). The description should be sufficiently detailed to fully define the structure of the diet.

Students are required to register for modules to a value of 120 credits in each academic year. These modules are chosen from those offered in the C700 programme diet, as detailed below.

In the first year, you will study 120 credits, comprising the following:

- 6 x 15 credit compulsory modules (totalling 90 credits, across Semesters A & B)
- 3 x 10 credit compulsory modules (totalling 30 credits, across Semesters A & B)

In the second year, you will study 120 credits, comprising the following:

- 5 x 15 credit compulsory modules,
 - BIO202 Biochemistry Communication (Semester A and B)
 - BIO223 Genes and Bioinformatics (Semester B)
 - BIO263 Membrane & Cellular Biochemistry (Semester B)
 - BIO265 Metabolic pathways (Semester B)
 - BIO269 Techniques for biological & chemical sciences (Semester A)
- 3 x 15 credit elective modules from the discipline elective group (totalling 45 credits, across Semesters A & B). One of these electives should be a CHE module from Semester A

To be eligible for the award of BSc (Hons) Biochemistry with year in industry/research, students must take SBC5001 after the 2nd year and then return to QMUL the following year to complete the Year 3 diet in their 4th Year of study.

To be eligible for the award of BSc (Hons) Biochemistry with year abroad, students must take SBC5000 after the 2nd year and then return to QMUL the following year to complete the Year 3 diet in their 4th Year of study.

In third year, you will study 120 credits comprising the following:

- 5 x 15 credit compulsory modules,
 - BIO301 Biochemistry Communication (Sem A and B)
 - BIO361 Membrane Proteins (sem A)
 - BIO363 Molecular basis of disease (sem A)
 - BIO365 Enzyme Catalysis (sem B)
 - BIO367 Protein Structure, Folding & Assemblies (sem B)
- 1 x compulsory elective module from the Project group (totalling 30 credits, across Semesters A & B)
- 1 x elective module from the discipline elective group (15 credits, across Semesters A & B).

Choice between electives is generally unrestricted, but with the exceptions that:

- you must not register for more than 75 credits in total in any given semester

Programme Title: BSc Biochemistry, with extramural year variants

- you must check that you satisfy the prerequisites before registering for any elective module
- you must register for one of BIO600, BIO603 or BMD606 in the final year.

Academic Year of Study FT - Year 1

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
Practical Molecular & Cellular Biology	BIO190	10	4	Compulsory	1	Semester 1
Cells	BIO116	15	4	Compulsory	1	Semester 1
Fundamentals of Organic Chemistry	CHE102A	15	4	Compulsory	1	Semester 1
Molecular Genetics	BIO163	15	4	Compulsory	1	Semester 1
Essential Skills for Biochemists	BIO101	10	4	Compulsory	1	Semesters 1 & 2
Practical Biochemistry	BIO198	10	4	Compulsory	1	Semester 2
Physiology	BIO125	15	4	Compulsory	1	Semester 2
Fundamentals of Organic Chemistry	CHE102B	15	4	Compulsory	1	Semester 2
Basic Biochemistry	BIO161	15	4	Compulsory	1	Semester 2

Academic Year of Study FT - Year 2

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
Membrane and Cellular Biochemistry	BIO263	15	5	Compulsory	2	Semester 2
Techniques for Biological and Chemical Sciences	BIO269	15	5	Compulsory	2	Semester 1

Programme Title: BSc Biochemistry, with extramural year variants

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
Biochemistry Communication	BIO202	15	5	Compulsory	2	Semesters 1 & 2
Metabolic pathways	BIO265	15	5	Compulsory	2	Semester 2
Genes and Bioinformatics	BIO223	15	5	Compulsory	2	Semester 2
Structure & Reactivity in Organic Chemistry*	CHE202A	15	5	Elective	2	Semester 1
Pharmaceutical Chemistry	CHE206A	15	5	Elective	2	Semester 1
Comparative & Integrative Physiology	BIO215	15	5	Elective	2	Semester 1
Cell biology and developmental genetics	BIO213	15	5	Elective	2	Semester 1
Cellular & Molecular Neuroscience*	BMD261	15	5	Elective	2	Semester 1
Structure & Reactivity in Organic Chemistry	CHE202B	15	5	Elective	2	Semester 2
Pharmaceutical Chemistry	CHE206B	15	5	Elective	2	Semester 2
Microbial physiology & growth	BIO231	15	5	Elective	2	Semester 2
*indicates paired electives, Students can only take one of these two.						

Academic Year of Study FT - Year 2

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
One of the following modules must be taken to qualify for one of the extramural year degrees:			5	Core		
SBCS External Placement Module	SBC5001	120	5	Core	3	Semesters 1-3
SBCS Study Abroad Year	SBC5000	120	5	Core	3	Semesters 1 & 2

Academic Year of Study FT - Year 3

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
Biochemistry Communication	BIO301	15	6	Compulsory	3	Semesters 1 & 2
Membrane Proteins	BIO361	15	6	Compulsory	3	Semester 1
Molecular Basis of Disease	BIO363	15	6	Compulsory	3	Semester 1
Enzyme Catalysts	BIO365	15	6	Compulsory	3	Semester 2
Protein Structure, Folding and Assemblies	BIO367	15	6	Compulsory	3	Semester 2
Functional genomics and epigenetics	BIO327	15	6	Elective	3	Semester 2
Neuroscience: from molecules to behaviour	BIO333	15	6	Elective	3	Semester 2
Advanced Pharmaceutical Chemistry	CHE306U	15	6	Elective	3	Semester 2
Endocrine Physiology and Biochemistry	BMD311	15	6	Elective	3	Semester 1
Topics in Biological Chemistry	CHE309	15	6	Elective	3	Semester 2
Biological Science Research Project (Project Elective)	BIO600	30	6	Elective	3	Semesters 1 & 2
Project skills in the life sciences (Project Elective)	BIO603	30	6	Elective	3	Semesters 1 & 2
Engaging the Public with Science (Project Elective)	BMD606	30	6	Elective	3	Semesters 1 & 2

What are the entry requirements?

Candidates must be able to satisfy the general admissions requirements of the University and meet the requirements for this specific programme of study. This is usually achieved in one of the following ways (note - the entry-points tariff is subject to annual review):

Programme Title: BSc Biochemistry, with extramural year variants

For direct entry to the degree programme, candidates must usually possess a minimum total of ABB at A2 level, including a minimum of a grade B in 'A2' Biology and grade C in 'A2' Chemistry, or equivalent qualifications.

or via

Admission to the QMUL Science and Engineering Foundation Programme (SEFP), and successful completion of the foundation year (defined by achievement of the minimum requirements for progression defined in the SEFP programme regulations, and the criteria specified in the SEFP Student Handbook for progression to this particular degree programme).

International students should be offering IELTS 6.5 (with a minimum of 6.0 in writing), or equivalent.

How will the quality of the programme be managed and enhanced? How do we listen to and act on your feedback?

Quality of the programme will be managed and enhanced through institutional and School level reviews. These will take the form of the Annual Programme Review, Programme Teaching Groups, and Teaching and Learning Committee. Additionally, student feedback (via SSLC and Module Evaluations) will be considered when developing modules and programmes.

What academic support is available?

The Student-Staff Liaison Committee (SSLC) provides a formal means of communication and discussion between the School and its students. The committee consists of student representatives from each year in the School, together with appropriate representation from staff within the School. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. The Student-Staff Liaison Committees meets regularly throughout the year.

The Teaching & Learning Committee advises the School's Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level, including monitoring the application of relevant QM policies and reviewing proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee's work in a number of ways, such as through consideration of student surveys and input from the SSLC.

All schools/institutes operate an Annual Programme Review of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery; the main document of reference for this process is the Taught Programmes Action Plan (TPAP) which is the summary of the school/institute's work throughout the year to monitor academic standards and to improve the student experience. Students' views are considered in this process through analysis of the NSS and module evaluations.

Programme-specific rules and facts

NA

Programme Title: BSc Biochemistry, with extramural year variants

Specific support for disabled students

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:

- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students' Allowance (DSA)
- Arranging DSA assessments of need
- Special arrangements in examinations
- Accessing loaned equipment (e.g. digital recorders)
- Specialist one-to-one "study skills" tuition
- Ensuring access to course materials in alternative formats (e.g. Braille)
- Providing educational support workers (e.g. note-takers, readers, library assistants)
- Mentoring support for students with mental health issues and conditions on the autistic spectrum.

Links with employers, placement opportunities and transferable skills

The Biochemistry programme will give an excellent training for a career as a research scientist as well as many transferable skills for other employment routes.

Programme Specification Approval

Person completing Programme Specification:

Dr John Viles

Person responsible for management of programme:

Dr John Viles

Date Programme Specification produced / amended by School / Institute Learning and Teaching Committee:
