

The digitisation request form can be completed to request:

- A scan of a chapter or section of a book
- Access to an individual article not included in the library's ejournal collection

The request will be checked for copyright compliance and availability. If it can be supplied, the document will be attached directly to the reading list.

To make a digitisation request, first add the item to your reading list. If you are requesting a scan of a book held by the library, please bookmark from the library catalogue.

Once the item appears on your list click the three dots item menu on the right-hand side and select Request digitisation:

You will be prompted for information about the section or article, please provide page numbers wherever possible. If you are requesting a chapter with notes or bibliographic references on separate pages, you can also add the page numbers for these. If you already have a high quality scan of the document you can also use the 'Choose File' button to upload it and it will be checked by library staff.

No file chosen

I confirm the supplied file represents only the content described within this request

If your list has been linked to a module, these details should be automatically populated, along with your name and email address. If these do not appear, please link the list to a module before submitting the form by searching for the module in the Hierarchy:
