

IRC 25 year Celebration

Friday 11 November 2016, 10.00 – 22.00
The Octagon, Queens Building, QMUL,
Mile End London E1 4NS

A celebratory event marking 25 years since the IRC's launch will be held at QMUL. This will provide an opportunity for former colleagues to catch up and network, to develop future research collaborations at QMUL and to hear about what people have been doing. The IRC pioneered innovation, development and testing of biomaterials and addressed the fundamentals of biological and clinical interfacing of materials.

IRC 25 year Celebration

The IRC legacy at QMUL is the Institute of Bioengineering, established in 2015, a cross-faculty initiative bringing together 50 academics from the faculties of Science & Engineering and Medicine & Dentistry.

The Institute provides a focus for ground-breaking research aimed at the development of new medical technologies to meet the key healthcare challenges of the 21st century.
