# Methodology

This report presents findings from the winter 2016 wave of Ipsos MORI's Members of Parliament survey, part of Ipsos MORI's programme of regular multi-sponsored studies among key audiences.

## Sample

An initial sample of **440** MPs were contacted and quotas on ministerial status within party were set to ensure those interviewed closely represent the profile of the House of Commons

This resulted in **149** interviews in total. The questionnaire was 'versioned'; **101** MPs answered the Kings College London and Queen Mary University questions unless additional filters were applied:

Base	101
	48
	43
	7
Other	3

## Fieldwork Dates

Fieldwork dates:  
**31 October – 21 December 2016**

All data was collected through face to face interviews with MPs at their Westminster offices

## Interpretation

Sometimes the percentage result for 'All MPs' may be greater than the sum of Labour and Conservative MPs, as it includes results from other parties. Where results do not sum to 100%, this may be due to computer rounding, multiple responses, or the exclusion of 'don't know' categories.

Data have been weighted to reflect the true balance by political party

## About Ipsos MORI Reputation Centre

The Ipsos MORI Reputation Centre was established with a simple aim: to help companies build more resilient reputations through stronger relationships with the people who matter most to them. Our approach is based on the understanding that research needs to be a catalyst for positive change – providing clear and practical advice that feeds directly into the stakeholder communications process.

The Key Influencer Tracking programme is a suite of multi-client studies that examine the attitudes and opinions of a range of elite, opinion forming stakeholder audiences. The first of these surveys was set up nearly 40 years ago and the programme has gone from strength to strength ever since. Further details can be found at; [www.ipsos-mori.com/kit](http://www.ipsos-mori.com/kit)

This work was carried out in accordance with the requirements of the international quality standard for market research, ISO 20252:2006 and with the Ipsos MORI Terms and Conditions which can be found [here](#)
