

Financial Literacy Project

How can I get involved?

This role is for 2nd year UG students.

As a FL student you will develop practical collaborative tool kits involving knowledge of the economics and finance with the collaboration with another SKETCH pillar as an interdisciplinary project. The group will be researching what elements of financial literacy you want to cover/focus on for the content of the interactive tool. The other interdisciplinary students will be considering what options might be the best to create. These two inputs combined will decide what path to take, in terms of what tool will you be creating as a project.

If you are selected as a FL Student for this project, you will;

- Engage with theories and make decisions on how to present the principles you learned on a daily basis to a wider audience.
- Build and solidifying the knowledge and work collaboratively to design an immersive platform online.

What does a FL Student do?

You create a resource. The resource could be a checklist, a chart, a Venn Diagram – whatever your group think the best way is to help the audience remember some of the critical, practical information that you will be teaching them. The resource can be an interdisciplinary project. This means that you will be working alongside students from other schools. Your resource will be published on the qNomics website, so that the public can access it and benefit from it.

In addition, you will learn essential skills to enhance your employability including factual analysis, research and drafting skills, financial literacy awareness, time management, and problem solving.

Your Commitment?

You are required to attend below sessions. (Participation mandatory)

- The Introduction Session on 26th September 2023, at **03 -04pm** – Arts Two Building:

3.20

- The Induction Session on 13 October 2023, at **11 am –12 pm** Graduate Centre Room GC 305.

You will have periodic catch up with the qNomics team during November to March but otherwise you will work with your team-mates flexibly around your schedule during that period. The Financial Literacy project may take various shapes depending on the scope and the audience. It may be a resource tool that you will be asked to develop together with students from another disciplinary. Similarly, the students are required to explore what start up events are available in the city and attend one networking event per semester. Make sure to collect the qNomics business cards from the qNomics Coordinator prior to the event. After the event, it is important for you to report the outcome of your visit. *A standard format is available for you to share this information and it will be provided to you.

Timeline

It may vary in length depending on the scope of your activity. Usually, this is an activity that spans across both Semester A and B.
