

Anti- Racism Steering Committee

Governance Structure

School of
Medicine and
Dentistry

Queen Mary

University of London

Barts and The London

DEFINITION OF ANTI-RACISM

"The active process of identifying and eliminating racism by changing systems, organizational structures, policies and practices and attitudes, so that power is redistributed and shared equitably."

- NAC International Perspectives

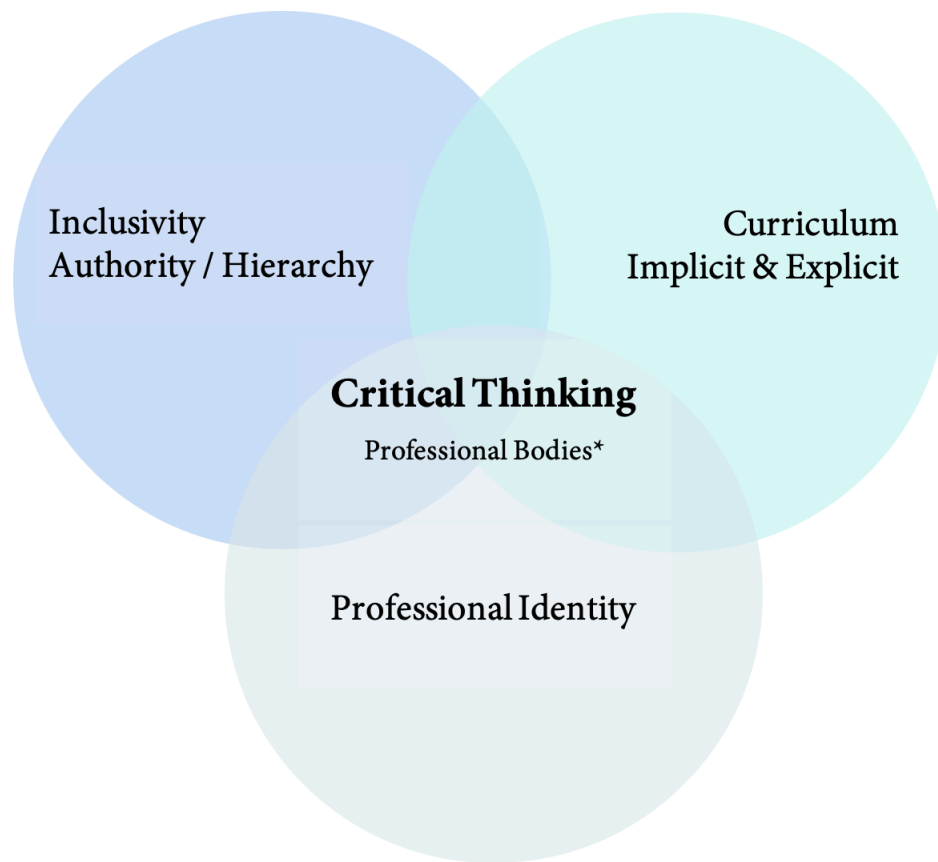

Introduction

The following document sets out the governance structure for the work of the anti-racism committee at Barts and the London School of Medicine and Dentistry. While the aim of the document is to clarify the remit and scope of the committee, decision making and reporting processes, it is important to highlight that this is built on a particular understanding of intent of the committee. That is, the committee aims to start and continue conversations about anti-racism, educate faculty and students, and demonstrate intersectionality, or overlapping, of different socialised identities such as race, ethnicity, gender and socioeconomic status that can become marginalised in schools of medicine and dentistry.

The governance structure is based on a pragmatic theoretical framework as well as principles, or values that include equity, fairness, transparency, respect and inclusivity. The framework and principles underpin the governance structure and affect both what is achieved and operationalised within the committee as well as providing a code of conduct for initiatives beyond the committee, within the schools of medicine and dentistry, Queen Mary University of London, the NHS, and professional bodies.

In order to organize this different way of thinking, the theoretical framework is based on three main, yet overlapping, areas of activity or inquiry. These are inclusivity, professional identity and curriculum (see Figure 1). These activities explore both the explicit and the implicit curriculum. The explicit curriculum is that in the core curriculum documents. The implicit curriculum is the informal, unchallenged and taken-for-granted view of the world where implicit bias resides and hierarchies occur. The implicit curriculum is concerned with social roles, personal self-image, behaviours and professional identity.

Figure 1:
Theoretical framework underpinning governance structure of anti-racism committee

* Professional Bodies:
General Medical Council (GMC), Faculty of Physician Associates (FPA), Royal College of Physicians (RCP),
General Dental Council (GDC), National Health Service (NHS)

Remit and Scope

- To improve the quality and representation of racial issues in the medical curriculum.
- To work collaboratively with students to work towards decolonising the curriculum (meaning to make changes to the curriculum that lead to a better presentation of the diversity of thought, experiences, and resources) to ensure issues of race and racial bias are embedded into the medical curriculum.
- To facilitate meaningful engagement, involvement and feedback loops for students to directly input into discussions on medical curriculum reform.
- To ensure students and staff are made aware of their own racial implicit biases.
- To actively engage the voices of students and staff from Black, Asian and Minority Ethnic (BAME) backgrounds

The contribution of work from this steering committee will actively support the institution in striving towards the Race Equality Charter Mark and the British

Medical Association (BMA) Charter Mark for racial harassment. Furthermore, it supports current curriculum revisions, in preparation for the new Graduate 2025 medical curriculum, fulfilling the outcomes listed below.

General Medical Council’s Graduate Outcomes in Relation to Diversity

“Medical school curricula must give medical students the opportunity to gain knowledge and understanding of the needs of patients from diverse social, cultural and racial/ethnic backgrounds, with a range of illnesses or conditions and with protected characteristics.” (Promoting Excellence, 2018; 3d; 33)

“Medical students must be taught how to evaluate the environmental, social, behavioural and cultural diversity factors which influence health and disease in different populations.” (Graduate outcomes, 2018; 25c; 23)

“Medical students must be able to assess, by taking a history, the environmental, social, psychological, behavioural and cultural diversity factors influencing a patient’s presentation, and identify options to address these, including advocacy for those who are disempowered.” (Graduate outcomes, 2018; 25d; 23)

Steering Committee

The steering committee is a student-staff collaborative initiative and currently includes students and staff from Medicine, Dentistry, Physician Associate, Malta and Allied Healthcare Courses. The selection and recruitment of students and staff is explained later in the document.

Thaarabi Tharmapathy

BLSA BAME Student Representative

Dr Riya George

Co-Chair of Equality, Diversity and Inclusion SMD Committee

Yasmine Saima Jabbar

British Medical Association (BMA) Student Representative

Dr Nimesh Patel

Head of Assessment/ Senior Lecturer

Jed Ashman

Phase II Student Lead

Dr Wendy Lowe

Senior Lecturer in Sociology Medical Education

Guilia Olayemi

Phase II Student Lead

Dr Deepa Shah

Clinical Lecturer, Community Based Medical Education

Sally Mohammed

Phase III Student Lead

Dr Lucy Carter

GP & Physician Associate Lecturer

Christine Joerres

Phase II Student Lead

Dr Shahrar Ali

IHSE Equality, Diversity and Inclusion Lead

Halima Okewole

Phase III Student Lead

Dr Devina Raval

Lead in Clinical Skills (London)/ Senior Lecturer

Rakin Choudhury
BLSA Alumni Rep / Phase 3 Student Lead

Dr Ping Yip
Lecturer in Neuroscience

Ehsan Gauher
Gozo Society President (Malta)

Dr Megan Clinch
Senior Lecturer in Medicine and Society

Angie Anifalaje
Malta Student Representative

Ms Angela Rowlands
Head of Academic and Pastoral Support in Malta

Milton Justinsuthakaran
Dental Student President

Ms Gina Baker
Academic and Wellbeing Support in Malta

Mollie Cronin
Global Health Course Representative

Professor Mangala Patel
Professor of Bio Dental Materials

Sarah Abdel Samie Enani
Physician Associate Year 2 Representative

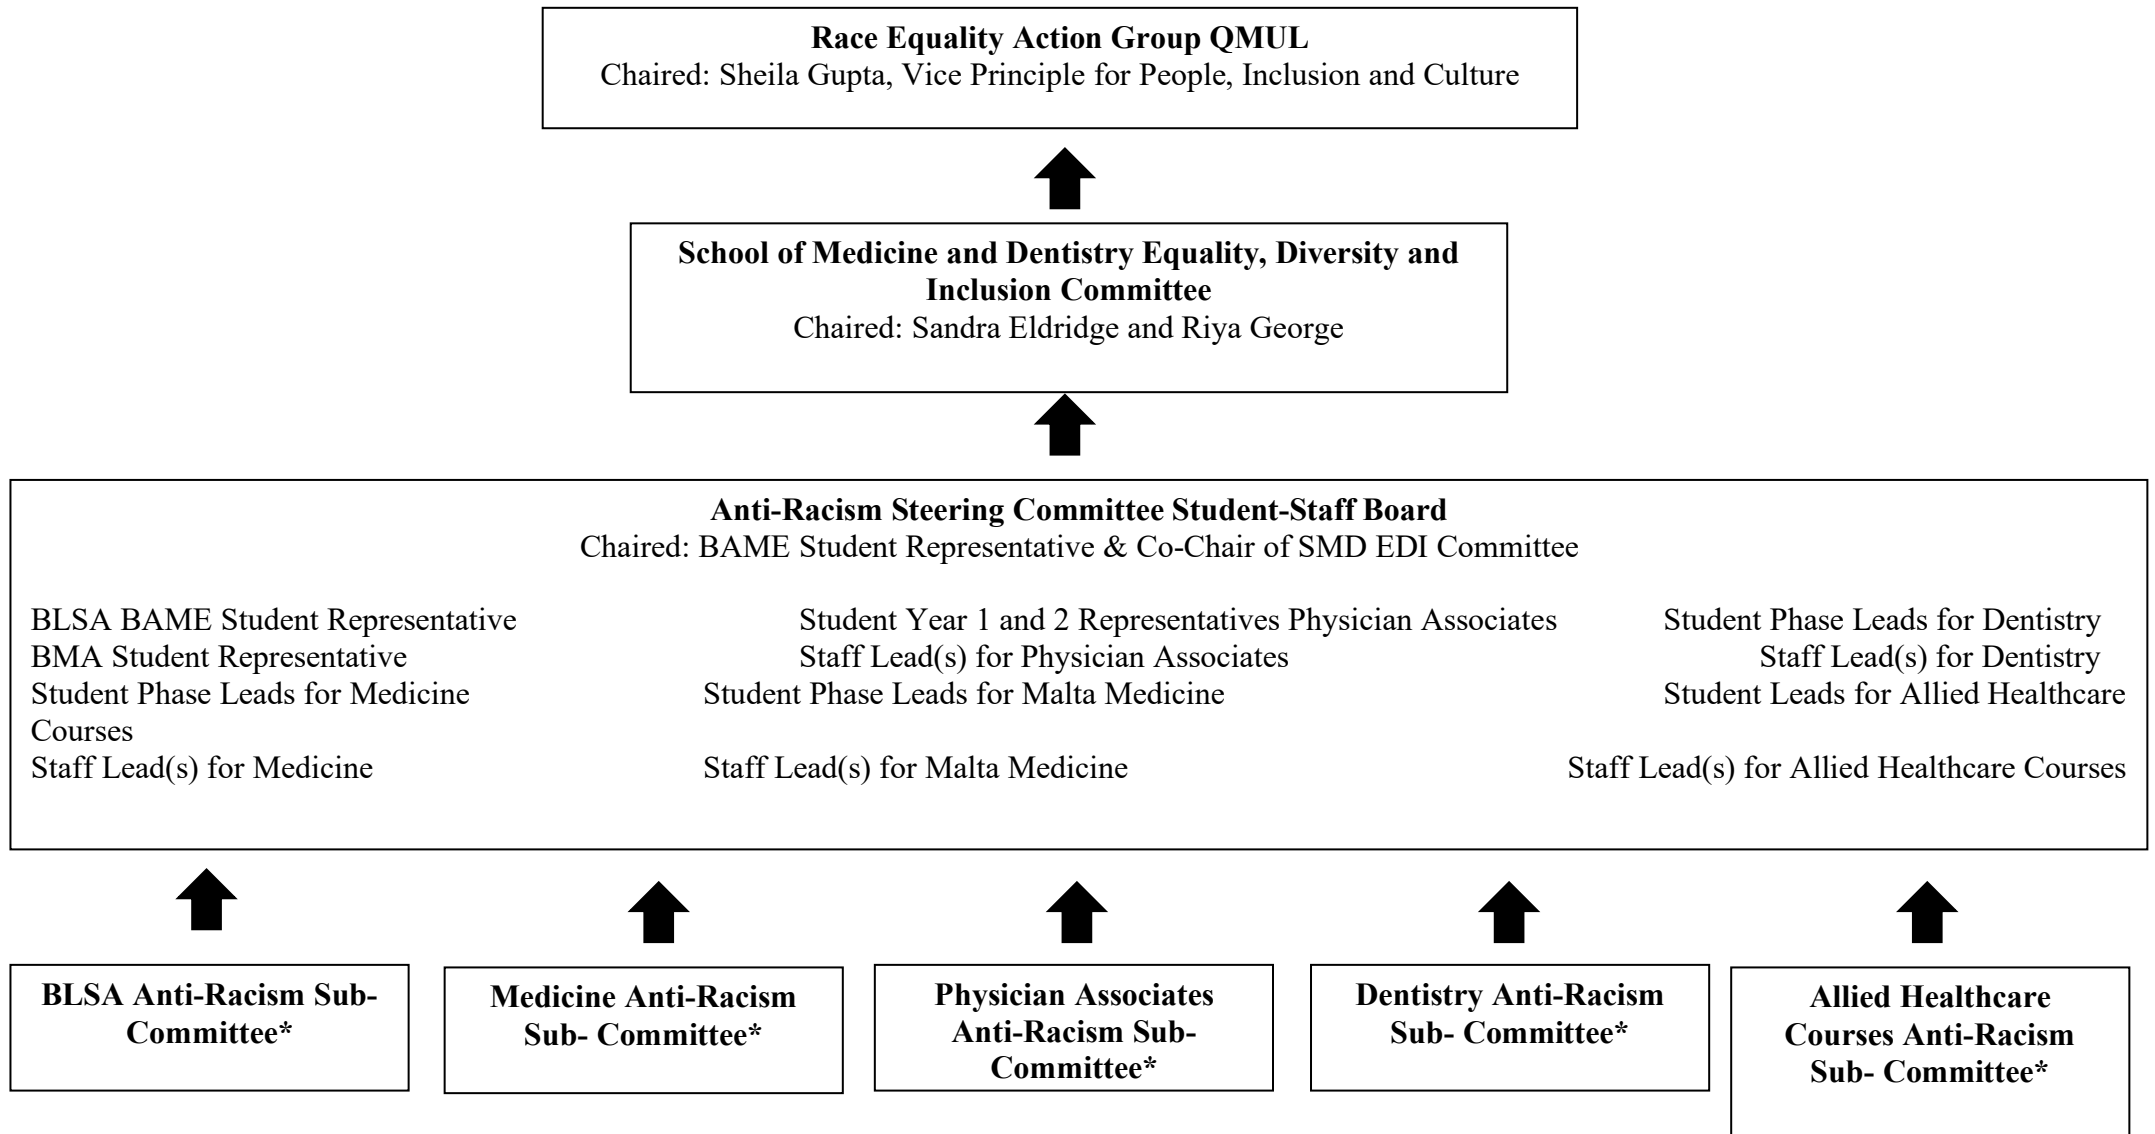

Dr Dominic Hurst
Senior Clinical Lecturer in Primary Dental Care

Maryam Syed, Faiza Asadi
*Physician Associate Year 1 student
Representative(s)*

Dr Shabana Younas
Senior Clinical Lecturer in Dentistry

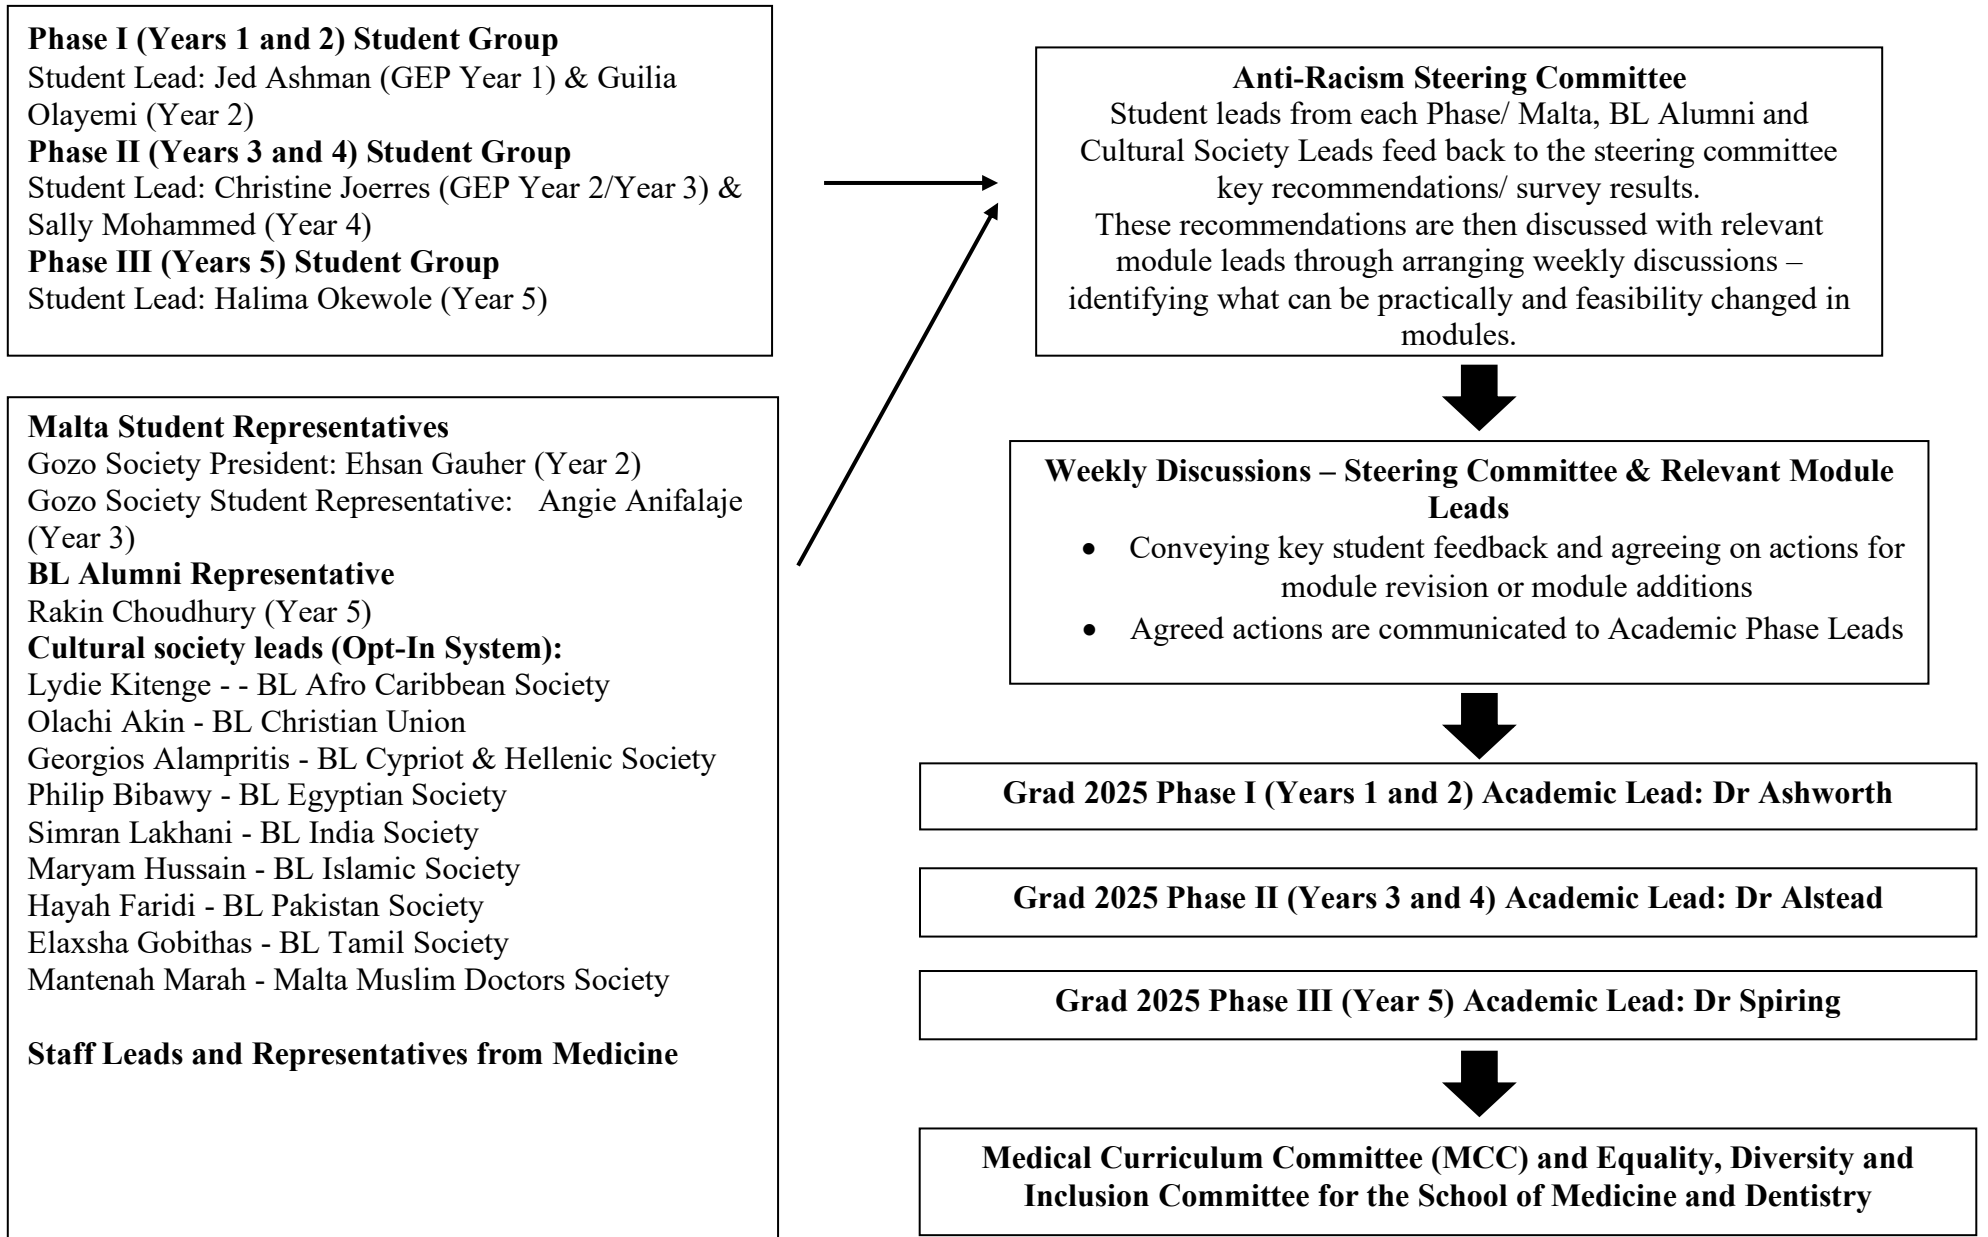

Governance Structure

To ensure this steering committee is formally embedded within existing structures and that the conversations within this committee are not side-lined. We propose the following governance structure outlined below:

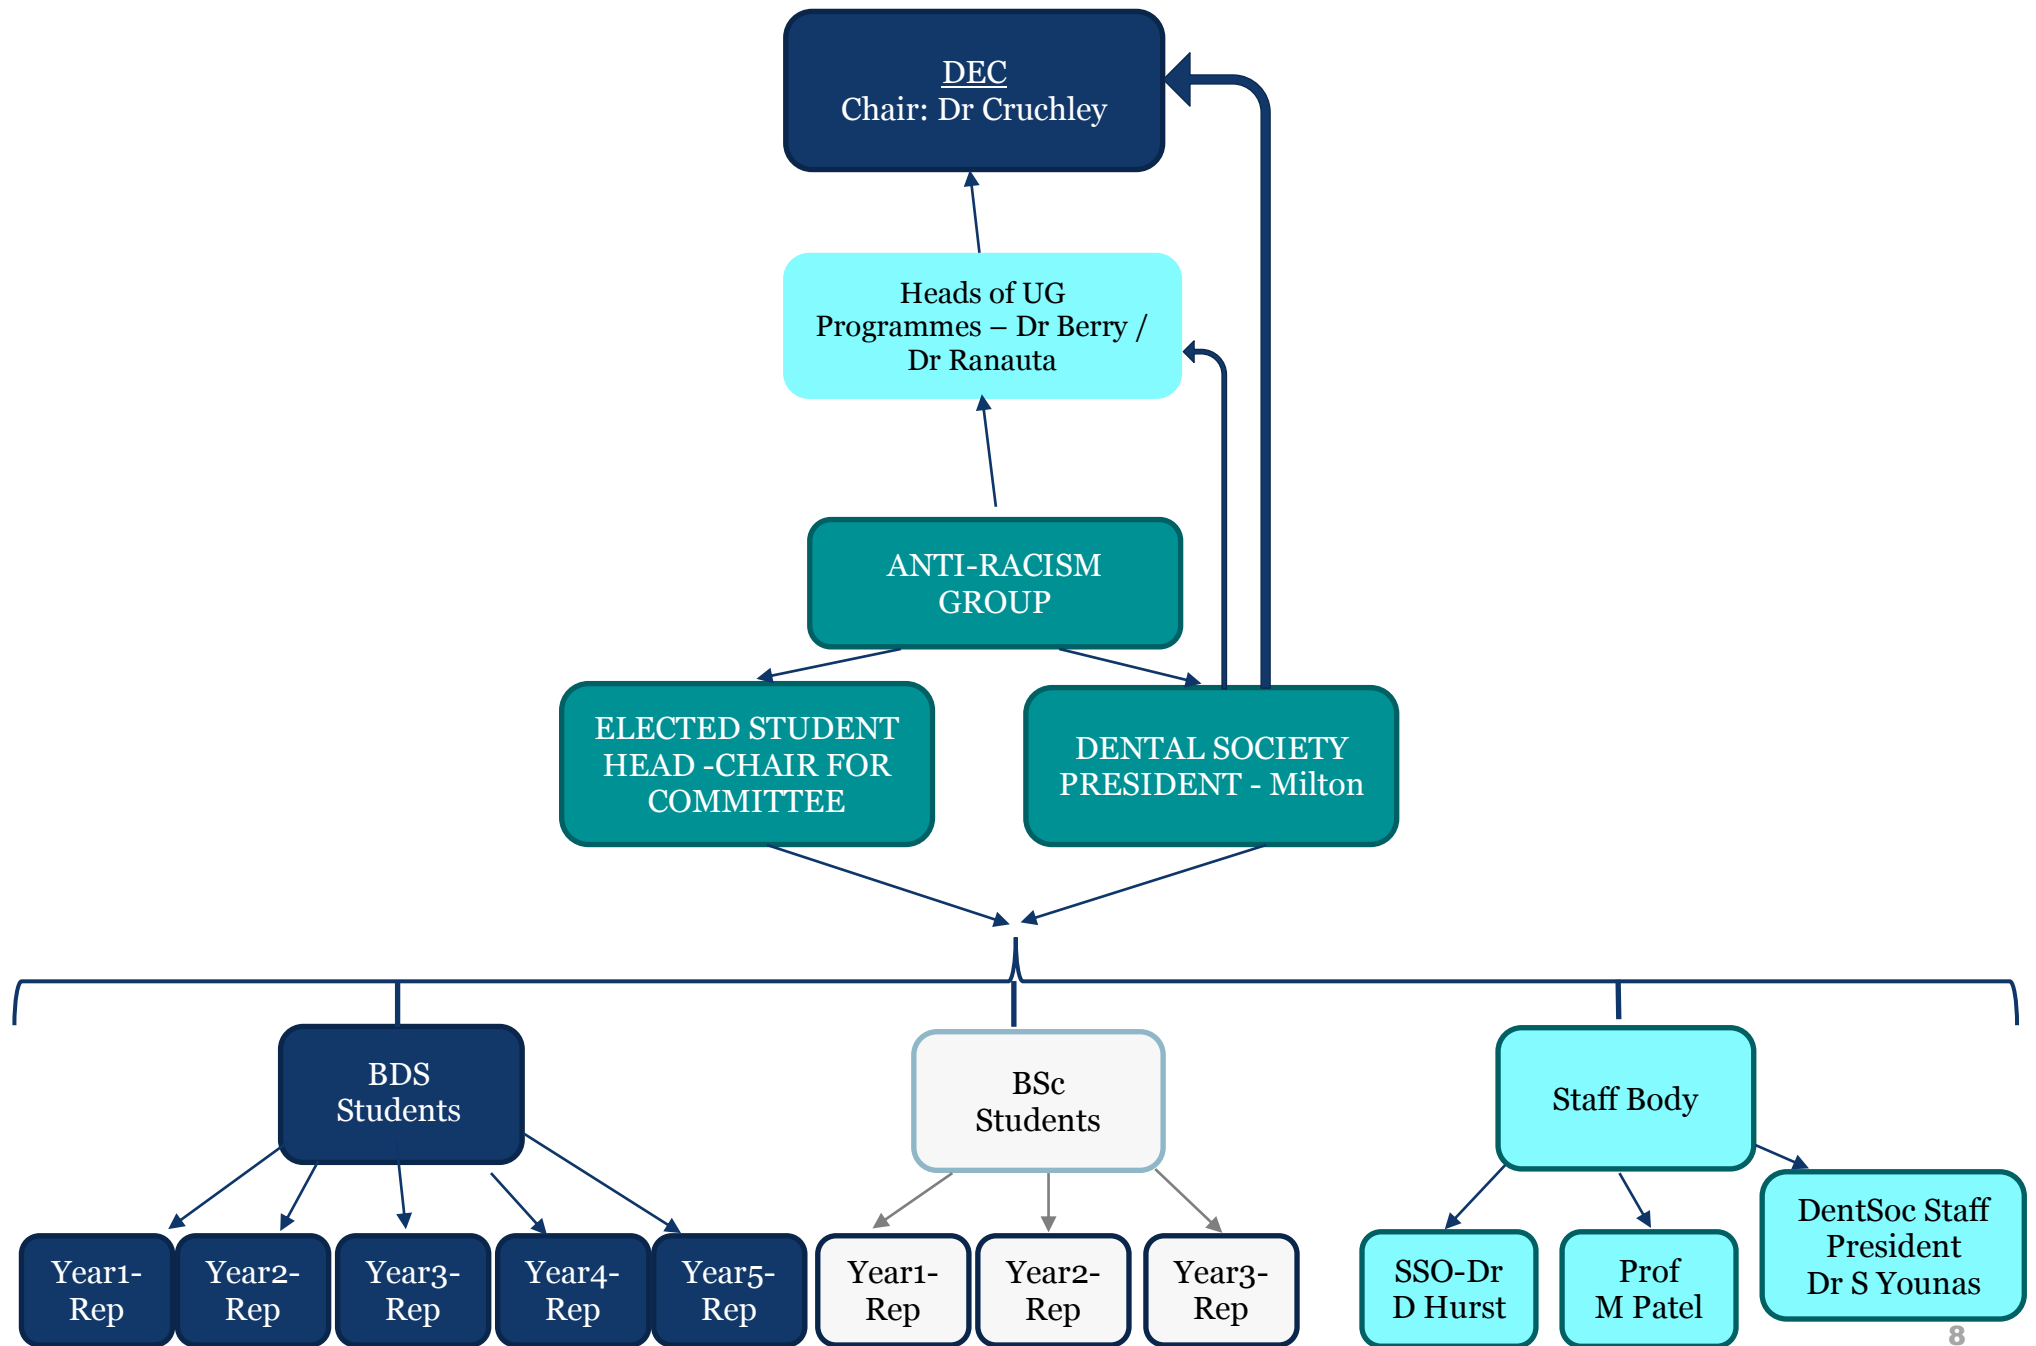

*Further information on the governance structure of each sub-committee is shown on separate pages below

School of Medicine Anti-Racism Sub Committee - Governance Structure

Institute of Dentistry – Anti-Racism Sub Committee

Physician Associates – Anti-Racism Steering Committee

PA Year 1 student Representative(s)
Maryam Syed, Faiza Asadi

PA Year 2 Representative (s)
Sarah Abdel Samie Enani

PA staff representative(s)
Dr Lucy Carter GP and PA lecturer

Anti-Racism Steering Committee
Student leads from each PA year group feed back to the steering committee key recommendations/ survey results. These recommendations are then discussed with relevant module leads through arranging weekly discussions – identifying what can be practically and feasibility changed in modules.

Weekly Discussions
Steering Committee & Relevant Module Leads

- Conveying key student feedback and agreeing on actions for module revision or module additions
- Agreed actions are communicated to PA faculty staff/ Module leads via PA faculty meetings

Physician Associate faculty

Year 1 Lead Dr Brenda Manorharan

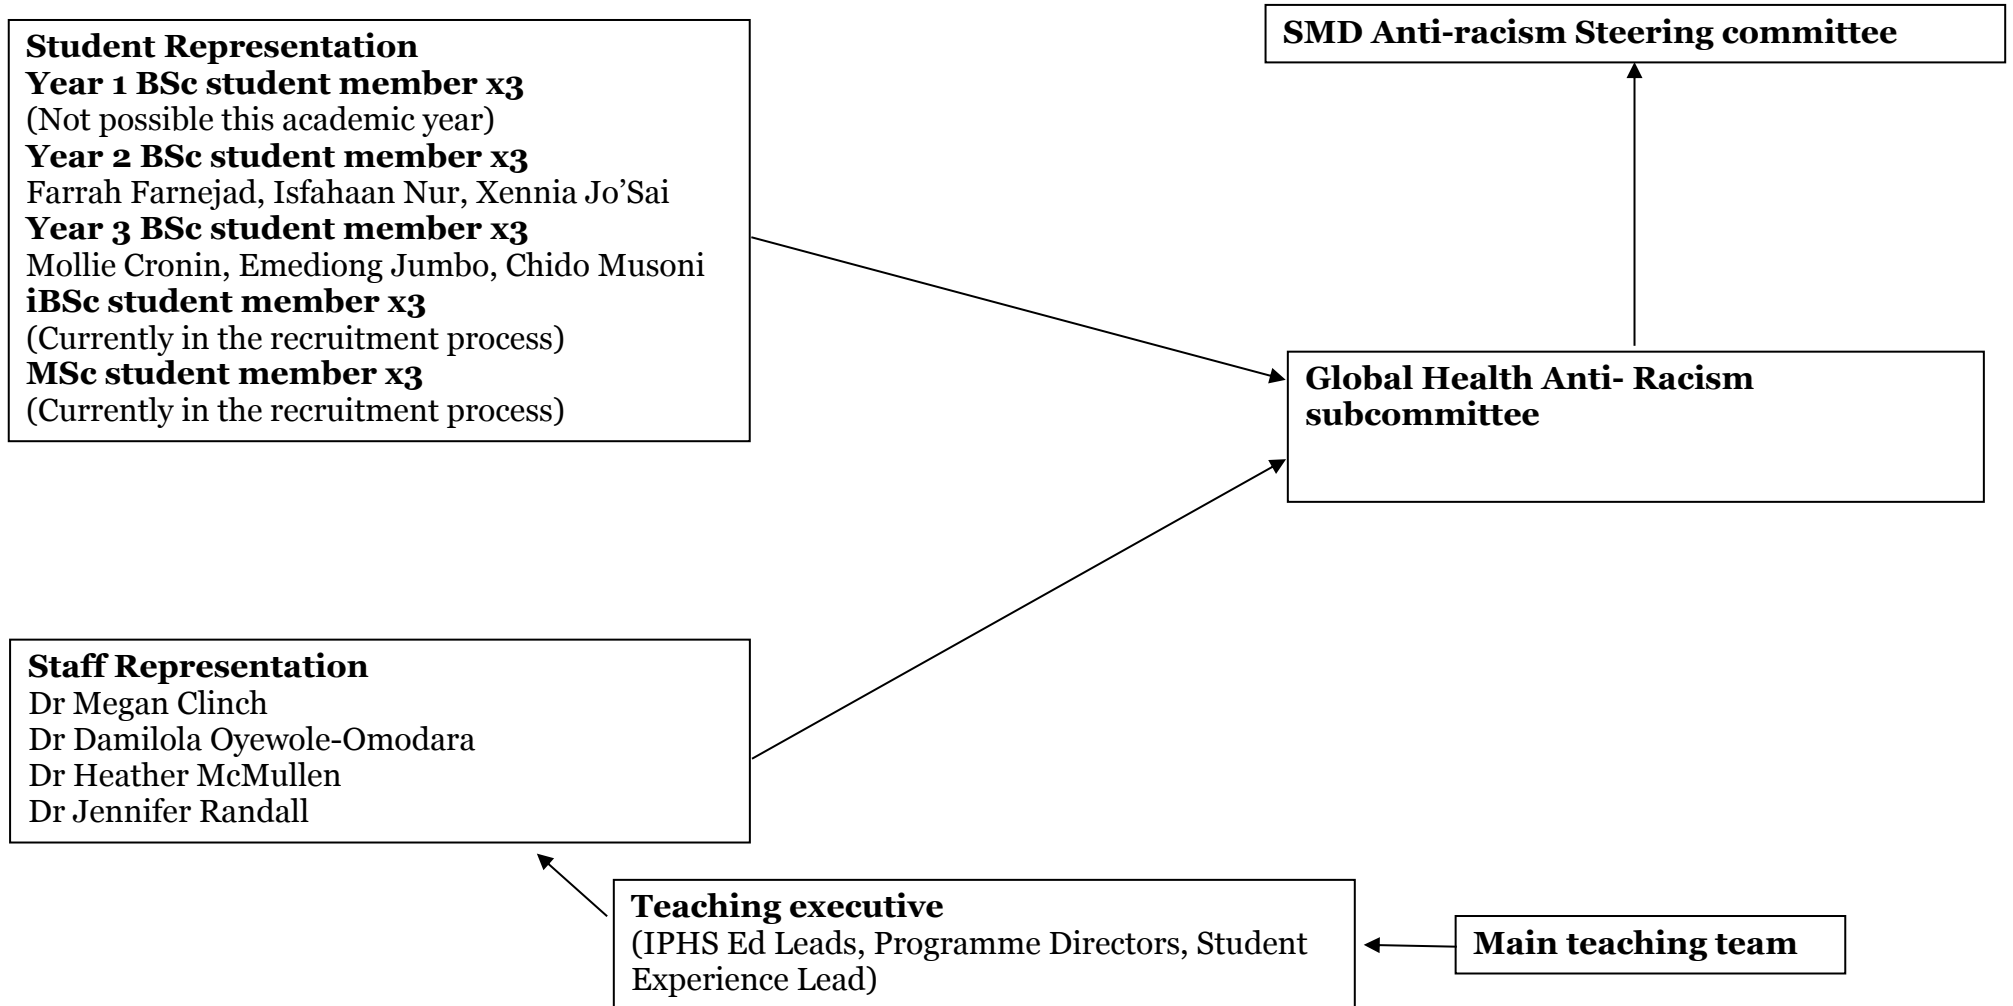

Year 2 Lead Vinodh Krishnamurthy

PA Faculty Head- Dr Arunthathi Mahendren

Medical Curriculum Committee (MCC) and Equality, Diversity and Inclusion Committee for the School of Medicine and Dentistry

Global Health – Anti-Racism Steering Committee

Roles and Responsibilities of Staff Leads

An open call to staff interested in participating in the committee was circulated to all staff in the Institute of Health Sciences Education.

- 1.) To commit to attending weekly steering committee meetings.
- 2.) To actively support and engage in regular discussions with students to gather their perspectives and feedback for medical curriculum reform.
- 3.) To liaise and co-ordinate weekly or fortnightly discussions with relevant module and academic leads and discuss changes that can be made.
- 4.) To act as a conduit between student groups and existing curriculum committees to feedback key discussion and concerns raised by students.
- 5.) To keep and maintain a transparent audit trail of actions taken to reform the curriculum in light of student feedback.

Roles and Responsibilities of Student Leads

Student Phase Leads (Phase 1, 2 & 3) and PA Student Leads:

- To provide a safe space both online and in-person forums throughout the academic year for students to discuss issues and concerns regarding race and racial bias and how these are taught in the medical curriculum.
- To identify key areas of feedback from students and relay this information to the Steering Committee.
- To share and discuss student feedback with relevant module and academic leads.
- To inform student phase groups of actions being taken in light of the student feedback received.

BL BAME Representative (BLSA):

- Student elected member of the BLSA Board to represent the views of BAME students from a Student Union perspective
- Currently acting as Student Lead – facilitates discussion between students and staff members
- Due to the elective nature of the role, during year 1/transition year, ex-officio representative from the academic year of 2019/2020 will be involved in the steering committee as well as the incoming representative for 2020/2021 to ensure continuity and a smooth transition and handover.

BMA Representative for BL:

- Liaises between other student BMA representatives from other universities & the steering group.
- Hold the Medical School accountable to ensure the BMA Charter is achieved.
- Due to the elective nature of the role, during year 1/transition year, ex-officio representative from the academic year of 2019/2020 will be involved in the steering committee as well as the incoming representative for 2020/2021 to ensure continuity and a smooth transition and handover.

BL Alumni Representative (BLSA):

- Engages & represents the views of BL Alumni with regards to their teaching of content in the past and how this has impacted their clinical practice.

Cultural Society Leads:

- Provide representation from all corners of Barts and The London to ensure students from different ethnic backgrounds have a platform to be heard.

Malta, Dental and Allied Health Student Leads:

- Engage & act as representatives for the opinions of students.

Selection of Student Members

- Due to the fast-approaching start of the next academic year (Year 1/Transition Year of the Steering Committee), current members of the steering committee will carry on as they are.
- Those in representative roles (BAME Rep, BMA Rep) will hold ex-officio roles whilst the incoming representatives will also join the committee. Those who are moving up to the next phase (current phase 1 & phase 2 student leads) will remain on the committee but will become the phase leads for the subsequent phases (phase 2 & phase 3). Therefore, this year we require an incoming Phase 1 Student Leads and intend recruiting through an anonymised application process.
- Selection process of future committee members after Year 1/Transition Year will be decided at a later date.

Collection of Learning Resources

This committee aims to continually build a repository of learning resources on issues of race and racism, to support faculty and students in learning about these issues. These resources have been added to the Queen Mary University of London equality and diversity web pages as well as the BRAIDE (Bringing Resources and Awareness to Diversity Education) on the QMPlus learning platform.
