Who we are...

...an established bioresource of participants who consent to participate and donate blood, saliva, urine and tissue samples.

What does Research mean for young people?
- Helping science for the future
- Trying new treatments
- Hope
- Benefit others in the future
- Improving lifestyle

The research we do...

...will be used for cardiovascular and other disease based research opportunities which will be translated back into improving health care...

Who we need

We need volunteers who are having a clinical procedure at Barts Health.
